The Internet has ushered in a new era in the economies of networking. With the increasing need for optimization based on these network economies, the IT-based e-business has become a platform for study as well as daily practice. In a similar vein, global warming has raised many issues which come into conflict with traditional research and policies.

The Internet revolution has also shifted our society from a government- and company-led economy to a 'netizen' - and consumer-led business world. This book enlightens us on why a harmonized participation of traditional network members or interested groups is necessary and how we can create values from diverse fields of interests and objectives, including the corporate social responsibility (CSR) and eco-friendly productivity. Digital Business and Sustainable Development integrates the platforms from these two fields of study based on the comparative analysis of Asian and other developing countries.

Children of Globalization is the first book-length exploration of contemporary Diasporic Coming-of-age Novels in the context of globalized and de facto multicultural societies. Diasporic Coming-of-age Novels subvert the horizon of expectations of the originating and archetypal form of the genre, the traditional Bildungsroman, which encompasses the works of Johann Wolfgang von Goethe, Charles Dickens, and Jane Austen, and illustrates middle-class, European, "enlightened," and overwhelmingly male protagonists who become accommodated citizens, workers, and spouses whom the readers should imitate. Conversely, Diasporic Coming-of-age Novels have manifold ways of defining youth and adulthood. The culturally-hybrid protagonists, often experiencing intersectional oppression due to their identities of race, gender, class, or sexuality, must negotiate what it means to become adults in their own families and social contexts, at times being undocumented or otherwise unable to access full citizenship, thus enabling complex and variegated formative processes that beg the questions of nationhood and belonging in increasingly globalized societies worldwide.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Mr. Cool is the coolest person in the world. He has a knack for knowing just what your ideal daredevil adventure would be, and he makes it happen just by clicking his fingers!

Dinosaur keeps insisting that he doesn't need to use the potty, as he makes lemonade, splashes in the sprinkler, and eats a three-juice-box lunch, until his victory dance makes him change his mind.
