### Saturn Run - John Sandford

However Saturn Run is written in the typical John Sandford way, great story, great characters, snatches of humour (I liked the last sentence in the book), not too much difficult to understand science. So an unusual book, completely different to previous themes, from the author, but a great one nevertheless.

John Sandford is an amazing, protean writer, and Saturn Run is a terrific story of alien first contact. It's a book Michael Crichton would have enjoyed, but never could have written; he didn't have Sandford's gift of good humor and his uncanny ear for dialogue.

He's been implanted with a sentient AI named Lyssa, only now waking to her massive power. Every other Human-AI hybrid has ended in insanity or death. Lyssa's creator, Heartbridge Corporation, knows she's on the run, knows Andy Sykes is guiding her path, knows he has everything to lose. "The book is like a dream you want to last forever" (Roberta Silman, The New York Times Book Review), now with a gorgeous new cover by the famed designer Peter Mendelsund The Rings of Saturn—with its curious archive of photographs—records a walking tour of the eastern coast of England. A few of the things which cross the path and mind of its narrator (who both is and is not Sebald) are lonely eccentrics, Sir Thomas Browne’s skull, a matchstick model of the Temple of Jerusalem, recession-hit seaside towns, wooded hills, Joseph Conrad, Rembrandt’s “Anatomy Lesson,” the natural history of the herring, the massive bombings of WWII, the dowager Empress Tzu Hsi, and the silk industry in Norwich. W.G. Sebald’s The Emigrants (New Directions, 1996) was hailed by Susan Sontag as an “astounding masterpiece perfect while being unlike any book one has ever read.” It was “one of the great books of the last few years,” noted Michael Ondaatje, who now acclaims The Rings of Saturn “an even more inventive work than its predecessor, The Emigrants.”

A New York Times bestseller! John Sandford and Michele Cook debut a high-octane thriller series about a ruthless corporation, unspeakable experiments, and a fight to expose the truth. Perfect for fans of James Dashner’s The Maze Runner. Shay Remby arrives in Hollywood with \$58 and a handmade knife, searching for her brother, Odin. Odin’s a brilliant hacker but a bit of a loose cannon. He and a group of radical animal-rights activists hit a Singular Corp. research lab in Eugene, Oregon. The raid was a disaster, but Odin escaped with a set of highly encrypted flash drives and a post-surgical dog. When Shay gets a frantic 3 a.m. phone call from Odin—talking about evidence of unspeakable experiments, and a ruthless corporation, and how he must hide—she’s concerned. When she gets a menacing visit from Singular’s security team, she knows: her brother’s a dead man walking. What Singular doesn’t know—yet—is that 16-year-old Shay is every bit as ruthless as their security force, and she will burn Singular to the ground, if that’s what it takes to save her brother.
