Written in a highly readable style, this book provides in-depth coverage of the concepts of management of financial institutions, focusing primarily on the banking sector and risk management. Divided into five parts, the text first looks at the framework of the Indian financial sector and examines the significance of various financial

Intermediaries. It then moves on to explain in detail the products and financial statements of banks and their methods of performance analysis. The book exposes the students to various risks faced by financial institutions and elaborates on the process of risk management. It analyzes the regulatory framework for financial institutions and discusses their capital management with emphasis on both the first and second Basel accords. In addition, the text provides a thorough exposition of the Indian banking industry in the light of latest trends, data and RBI regulations. KEY FEATURES □

Facilitates easy understanding of theory with the help of a number of figures, tables, graphs and worked-out examples. □ Highlights the key concepts in boxes throughout the text. □ Incorporates chapter-end questions and problems, case studies and computer-based exercises to help students master the concepts. This book is designed for a course in Management of Financial Institutions, offered to postgraduate students of management programmes (Finance and Banking) and commerce. It will also be useful to practising bankers and risk managers.

Financial Markets and Institutions is aimed at the first course in financial markets and institutions at both the undergraduate and MBA levels. While topics covered in this book are found in more advanced textbooks on financial markets and institutions, the

Explanations and illustrations are aimed at those with little or no practical or academic experience beyond the introductory-level finance courses. In most chapters, the main relationships are presented by figures, graphs, and simple examples. The more complicated details and technical problems related to in-chapter discussion are provided in appendixes to the chapters. Since the author team's focus is on return and risk and the sources of that return and risk in domestic and foreign financial markets and institutions, this text relates ways in which a modern financial manager, saver, and investor can expand return with a managed level of risk to achieve the best, or most favorable, return–risk outcome.

The last 30 years have been dramatic for the financial services industry. In the 1990s and 2000s, boundaries between the traditional industry sectors, such as commercial banking and investment banking, broke down and competition became increasingly global in nature. Many forces contributed to this breakdown in interindustry and intercountry barriers, including financial innovation, technology, taxation, and regulation. Then in 2008-2009, the financial services industry experienced the worst financial crisis since the Great Depression. Even into the mid-2010s, the U.S. and world economies have not recovered from this crisis. It is in this context that this book is written. As the

Economic and competitive environments change, attention to profit and, more than ever, risk become increasingly important. This book offers a unique analysis of the risks faced by investors and savers interacting through both financial institutions and financial markets, as well as strategies that can be adopted for controlling and better managing these risks. Special emphasis is also put on new areas of operations in financial markets and institutions such as asset securitization, off-balance-sheet activities, and globalization of financial services.
