On the legacy of Xenakis' innovations in music notation for contemporary composers Trained in mechanical engineering, Greek-French composer Iannis Xenakis (1922-2001) transformed mathematical models into architectonic musical entities. In the late 1970s Xenakis developed a digital apparatus that rendered waveforms drawn on a tablet as musical compositions. The device was called UPIC, or Unité Polyagogique Informatique du CEMAMu, named for the French contemporary music research institute that Xenakis had helped found a decade earlier. The device proved to be an essential tool for the development of contemporary music--a version of the software is still used by today's composers. Featuring archival materials, this book examines the origins of Xenakis' UPIC. It also serves as a compositional tool: embedded QR codes allow readers to create their own sound-images from UPIC compositions.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Drawing inspiration from John Cage's, Notations, Notations 21 features illustrated musical scores from more than 100 international composers, all of whom are making amazing breakthroughs in the art of notation. These spectacularly beautiful and fascinatingly creative visual pieces not only make for exciting music, but inspiring visual art as well. The scores are accompanied by written contributions from the artists that explore every facet of their creative processes, from inspiration to execution. Contributors include the likes of Karlheinz Stockhausen, Earle Brown, Halim El-Dabh, Joan La Barbara, and Yuji Takahashi, as well as emerging composers whose compositions are also visually astounding and important. In the spirit of honoring the 40th anniversary of

Cage's seminal book, while furthering it in a 21st century context, a portion of the sales will be donated to the Foundation for Contemporary Performing Arts.

The Nag Hammadi Scriptures, edited by Marvin Meyer, is the most complete, up-to-date, one-volume, English-language edition of the renowned library of Gnostic manuscripts discovered in Egypt in 1945, which rivaled the Dead Sea Scrolls find in significance. It includes the Gospel of Thomas, the Gospel of Mary, and the recently discovered Gospel of Judas, as well as other Gnostic gospels and sacred texts. This volume also includes introductory essays, notes, tables, glossary, index, etc. to help the reader understand the context and contemporary significance of these texts which have shed new light on early Christianity and ancient thought. The compilation of ancient manuscripts that constitute The Nag Hammadi Scriptures is a discovery that challenges everything we thought we knew about the early Christian church, ancient Judaism, and Greco-Roman religions.

Electronic music evokes new sensations, feelings, and thoughts in both composers and listeners. Opening the door to an unlimited universe of sound, it engages spatialization as an integral aspect of composition and focuses on sound transformation as a core structural strategy. In this new domain, pitch occurs as a flowing and ephemeral substance that can be bent, modulated, or dissolved into noise. Similarly, time occurs not merely as a fixed duration subdivided by ratios, but as a plastic medium that can be generated, modulated, reversed, warped, scrambled, and granulated. Envelope and waveform undulations on all time scales interweave to generate form. The power of algorithmic methods amplify the capabilities of music technology. Taken together, these constitute game-changing possibilities. This

convergence of technical and aesthetic trends prompts the need for a new text focused on the opportunities of a sound oriented, multiscale approach to composition of electronic music. Sound oriented means a practice that takes place in the presence of sound. Multiscale means an approach that takes into account the perceptual and physical reality of multiple, interacting time scales-each of which can be composed. After more than a century of research and development, now is an appropriate moment to step back and reevaluate all that has changed under the ground of artistic practice. Composing Electronic Music outlines a new theory of composition based on the toolkit of electronic music techniques. The theory consists of a framework of concepts and a vocabulary of terms describing musical materials, their transformation, and their organization. Central to this discourse is the notion of narrative structure in composition-how sounds are born, interact, transform, and die. It presents a guidebook: a tour of facts, history, commentary, opinions, and pointers to interesting ideas and new possibilities to consider and explore.

"Jean Genet's *The Screens*, hailed by many to be Genet's masterpiece, was staged in Paris in 1966 by the Jean-Louis Barrault-Madeleine Renaud Company. During the several months of rehearsals which Genet attended, he wrote a series of letters and notes to Roger Blin giving his views on every aspect of the staging of *The Screens*. His comments deal with the details of that play and that production, but also transcend them. What the book adds up to is a precise and fascinating compilation of Jean Genet's concept of the theater."--Page 4 of cover.

The Copenhagen metropolitan region accounts for nearly half of Denmark's national output and plays a key role for the

country as a whole. Nevertheless, it has witnessed only modest economic growth over the last decade. This review of metropolitan area policy for Copenhagen examines key challenges including modest economic growth, scarcity of skilled workers and barriers to research and development. The report also examines how public institutions affect regional economic growth. Issues considered include: inter-municipal co-operation, local finance, public management, political leadership, and coordination mechanisms between the central government and the region.
