Nelson Physics 12 provides a rigorous, comprehensive, and accurate treatment of all concepts and processes presented in Ontario's Physics, Grade 12, university Preparation course (SPH4U). This resource thoroughly equips students with the independent learning, problem-solving, and research skills that are essential to successfully meet the entrance requirements for university programs. Complex Physics concepts are presented in a clear, understandable fashion and key concepts, such as static equilibrium, are treated in greater depth than specified in the curriculum.

This book proposes practical and objective solutions to the entrenched water conflicts in the Middle East. The author reveals and clarifies the complexity of the water conflicts, drawing on years of experience facilitating and chairing water negotiations in the region. The bottom line is: Unless the countries involved cooperate, the consequences will be devastating. The lack of plentiful and clean water for the people will not only result in severe human suffering, but could also have grave geopolitical consequences. The book covers four critical areas: the Euphrates and Tigris Rivers, where new documentation reveals alarming trends; the politically sensitive Golan Heights, with its water disputed by Israel and Syria; the Hasbani water dispute between Lebanon and Israel; the longstanding water resource dispute between the Israelis and Palestinians
