Finalist for the Pulitzer Prize • Winner of the Council on Foreign Relations Arthur Ross Book Award • One of the New York Times' Ten Best Books of the Year "Impressive . . . Mr. Judt writes with enormous authority." —The Wall Street Journal "Magisterial . . . It is, without a doubt, the most comprehensive, authoritative, and yes, readable postwar history." —The Boston Globe Almost a decade in the making, this much-anticipated grand history of postwar Europe from one of the world's most esteemed historians and intellectuals is a singular achievement. Postwar is the first modern history that covers all of Europe, both east and west, drawing on research in six languages to sweep readers through thirty-four nations and sixty years of political and cultural change—all in one integrated, enthralling narrative. Both intellectually ambitious and compelling to read, thrilling in its scope and delightful in its small details, Postwar is a rare joy. Judt's book, *Ill Fares the Land*, republished in 2021 featuring a new preface by bestselling author of *Between the World and Me* and *The Water Dancer*, Ta-Nehisi Coates.

After Empires describes how the end of colonial empires and the changes in international politics and economies after decolonization affected the European integration process. Until now, studies on European integration have often focussed on the search for peaceful relations among the European nations, particularly between Germany and France, or examined it as an offspring of the Cold War, moving together with the ups and downs of transatlantic relations. But these two factors alone are not enough to explain the rise of the European Community and its more recent transformation into the European Union. Giuliano Garavini focuses instead on the emergence of the Third World as an international actor, starting from its initial economic cooperation with the creation of the United Nations Conference for Trade and Development (UNCTAD) in 1964 up to the end of unity among the countries of the Global South after the second oil shock in 1979-80. Offering a new - less myopic - way to conceptualise European history more globally, the study is based on a variety of international archives (government archives in Europe, the US, Algeria, Venezuela; international organizations such as the EC, UNCTAD, and the World Bank; political and social organizations such as the Socialist International, labour archives and the papers of oil companies) and traces the reactions and the initiatives of the countries of the European Community, but also of the European political parties and public opinion, to the rise and fall of the Third World on the international stage.

How did the culture of human rights develop? How did different schools of thought influence the legal documents and measures over the centuries? Was the French Revolution truly the turning point for human rights? This book analyses these fundamental questions and outlines the history of human rights from the 18th century to the present day. It captures in one lucid source the essential aspects of the subject and is both an introduction to the arguments, and the key to in-depth study of the concepts and principles. While pushing the traditional boundaries between philosophical histories of rights and legal ones, Flores provides an objective approach to the modern-day, westernised concept, and expands it to analyze the contributions from African, Asian and Islamic cultures.

This book introduces the reader to the relationship between the Italian national movement, achieved by the Risorgimento, and the Italian unification in 1860. These themes are discussed in detail and related to the broader European theatre.

Covering the literary, cultural, religious and political history of the period, Beales and Biagini show Italy struggled towards nation state status on all fronts. The new edition has been thoroughly rewritten. It also contains a number of new documents. In addition, all the most up to date research of the last 20 years has been incorporated. The Risorgimento and the Unification of Italy remains the major text on nineteenth century Italy. The long introduction and useful footnotes will be of real assistance to those interested in Italian unification.

'Globalization' has become a popular buzzword for explaining today's world. The expression achieved terminological stardom in the 1990s and was soon embraced by the general public and integrated into numerous languages. This text makes the case that globalization is not so new after all.

This peer-reviewed volume contains selected papers from the First EAGLE International Conference on Information Technologies for Epigraphy and Cultural Heritage, held in Paris between September 29 and October 1, 2014. Here are assembled for the first time in a unique volume contributions regarding all aspects of Digital Epigraphy: Models, Vocabularies, Translations, User Engagements, Image Analysis, 3D methodologies, and ongoing projects at the cutting edge of digital humanities. The scope of this book is not limited to Greek and Latin epigraphy; it provides an overview of projects related to all epigraphic inquiry and its related communities. This approach intends to furnish the reader with the broadest possible perspective of the discipline, while at the same time giving due attention to the specifics of unique issues.
