Guided democracy, also called managed democracy, is a formally democratic government that functions as a de facto autocracy. Such governments are legitimized by elections that are free and fair, but do not change the state's policies, motives, and goals.. In other words, the government controls elections so that the people can exercise all their rights without truly changing public policy.

for the National Research Council's Committee on International Conflict Resolution. The committee was organized in late 1995 to respond to a growing need for prevention, management, and resolution of violent conflict in the international arena, a concern about the changing nature and context of such conflict in the post-Cold War era, and a recent expansion of knowledge in the field. The committee's main goal is to advance the practice of conflict resolution by using the methods and critical attitude of science to examine the effectiveness of various techniques and concepts that have been advanced for preventing, managing, and resolving international conflicts. The committee's research agenda has been designed to supplement the work of other groups, particularly the Carnegie Corporation of New York's Commission on Preventing Deadly Conflict, which issued its final report

in December 1997. The committee has identified a number of specific techniques and concepts of current interest to policy practitioners and has asked leading specialists on each one to carefully review and analyze available knowledge and to summarize what is known about the conditions under which each is or is not effective. rigor inherent in the subject at the college level. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as engaged citizens. The organization and pedagogical features were developed and vetted with feedback from American government instructors dedicated to the project.

When you're running for local office for the first time, there are plenty of mistakes you can make. The good thing is that you're not the first person ever to face the challenges of running for office - even though sometimes it might seem like it. In this book, Craig W. Turner collects stories, advice, warnings and best practices from local candidates from around the country who have been there and done that. They've already seen what you're about to see, and they've generously shared their experiences for the benefit of you and other first-time candidates for local office. This is no poli-sci class. This is "in the trenches" life experience. Everyone interviewed for this book as part of The Campaign Coach Podcast, has run and won at least one election. Some are now retired, some have moved on to higher office, and some are still serving in the capacity we discussed in their interview. In these pages, you will find insights that no guidebook or

online course can give you - they will inspire you, and scare you, and motivate you and smack you in the face with a reality check. But, they will also make you a stronger candidate. Whether it's talking with voters, fundraising, understanding local government policy, promoting your candidacy or even knowing how to best serve your community, learning from these people's experiences - and avoiding mistakes that they've already made for you - will give you a leg up on any opponent.
