Introductory sociology reader containing articles that are evenly balanced between classic, contemporary, and cross-cultural topics.

A guide to Microsoft Word covers such topics as formatting, using columns, adding images, and integration with other software.

Di Benedetto considers theatrical practice through the lens of contemporary neuroscientific discoveries in this provoking study, which lays the foundation for considering the physiological basis of the power of theatre practice to affect human behavior. He presents a basic summary of the ways that the senses function in relation to cognitive science and physiology, offering an overview of dominant trends of discussion on the realm of the senses in performance. Also presented are examples of how those ideas are illustrated in recent theatrical presentations, and how the different senses form the structure of a theatrical event. Di Benedetto concludes by suggesting the possible implications these neuroscientific ideas have upon our understanding of theatrical composition, audience response, and the generation of meaning.

Explains how to use the Microsoft Office suite to create letters, documents, spreadsheets, presentations, e-mail, and Web sites.

Addresses a range of e-collaboration topics, with emphasis on virtual team leadership and collaborative engineering. Presents a blend of conceptual, theoretical, and applied chapters.

This book identifies, traces, and interrogates contemporary American culture's fascination with forensic science. It looks to the many different sites, genres, and media where the forensic has become a cultural commonplace. It turns firstly to the most visible spaces where forensic science has captured the collective imagination: crime films and television programs. In contemporary screen culture, crime is increasingly framed as an area of scientific inquiry and, even more frequently, as an area of concern for female experts. One of the central concerns of this book is the gendered nature of expert scientific knowledge, as embodied by the ubiquitous character of the female investigator. Steenberg argues that our fascination with the forensic depends on our equal fascination with (and suspicion of) women's bodies:with the bodies of the women investigating and with the bodies of the mostly female victims under investigation.

Digital journalism: putting the case in context -- Part I. Experiencing metrics -- The traffic game -- Enchanted metrics -- Part II. Making sense of metrics -- The interpretive ambiguity of metrics -- Clean and dirty data -- Part III. The struggle to monopolize interpretive labor -- The autonomy paradox -- Conclusion -- Appendix A: methods -- Appendix B: A guide to the Chartbeat Publishing Dashboard.
