Shaping Jerusalem: Spatial planning, politics and the conflict focuses on a hidden facet of the Israeli-Palestinian conflict; the relentless reshaping of the Holy City by the Israeli authorities through urban policies, spatial plans, infrastructural and architectural projects, land use and building regulations. From a political point of view, the Israeli-Palestinian conflict may appear to be at an impasse; however, it is precisely by looking at the city's physical space that one can perceive that a war of cement and stone is under way. Many books have been written on the Israeli-Palestinian conflict over Jerusalem; some of them have focused on the urban fabric; Shaping Jerusalem uniquely discusses the role of Israeli spatial actions within the conflict. It argues that Israel's main political objective - control over the whole city - is ordinarily and silently pursued through physical devices which permanently modify the territory and the urban fabric. Archaeological discoveries in Jerusalem capture worldwide attention in various media outlets. The continuing quest to discover the city's physical remains is not simply an attempt to define Israel's past or determine its historical legacy. In the context of the ongoing Israeli-Palestinian conflict, it is also an attempt to legitimate—or undercut—national claims to sovereignty. Bridging the ever-widening gap between popular coverage and specialized literature, *Finding Jerusalem* provides a comprehensive tour of the politics of archaeology in the city. Through a wide-ranging discussion of the material evidence, Katharina Galor illuminates the complex legal contexts and ethical precepts that underlie archaeological activity and the discourse of "cultural heritage" in Jerusalem. This book addresses the pressing need to disentangle historical documentation from the religious aspirations,

Planning for a City of Culture gives us a new way to understand how cities use arts and culture in planning, fostering livable communities and creating economic development strategies to build their brand, attract residents and tourists, and distinguish themselves from other urban centers worldwide. While the common thinking on creative cities may coalesce around the idea of one goal--economic development and branding--this book turns this idea on its head. Goldberg-Miller brings a new, fresh perspective to the study of creative cities by using policy theory as an underlying construct to understand what happened in Toronto and New York in the 2000s. She demystifies the processes and outcomes of stakeholder involvement, exogenous and endogenous shocks, and research and strategic planning, as well as warning us about the many pitfalls of neglecting critical community voices in the burgeoning practice of creative placemaking. This book is an essential resource in examining the development and sustainability of the global trend of integrating arts and culture in city planning and urban design that has become an international phenomenon. Perfect for students, scholars, and city-lovers alike, Planning for a City of Culture illuminates the ways that this creative

Revolt and Reform in Architecture's Academy uniquely addresses the complicated relationship between architectural education and urban renewal in the 1960s, which paved the way for what is today known as public interest design. Through an examination of curricular reforms at Columbia University's and Yale University's schools of architecture in the 1960s, this book translates the "urban crisis" through the experiences of two influential groups of architecture students, as well as their contributions to design's lexicon. The book argues that urban renewal and campus expansion half a century ago recast architectural education at two schools whose host cities, New York and New Haven, were critical sites for political, social, and urban upheaval in America. The urban challenges of that time are the same challenges rapidly growing cities face today—access, equity, housing, and services. As architects, architects in training, and architecture students continue to wrestle with questions surrounding how design may serve a broadly defined public interest, this book is a timely

assessment of the forces that have shaped the debate.

Comprehensive and current, this handbook combines a wide range of international contributors to chart the uneasy relationship between feminism, criminology and victimology. It explores both the historical and contemporary questions posed by feminist work and is essential reading for anyone interested in feminism, criminology and social change.

Discussions of the illicit and the illegal have tended to be somewhat restricted in their disciplinary range, to date, and have been largely confined to the literatures of anthropology, criminology, policing and, to an extent, political science. However, these debates have impinged little on cognate literatures, not least those of urban and regional studies which remain almost entirely undisturbed by such issues. This volume aims to open up debates across a range of cognate disciplines. The *Illicit and Illegal in Regional and Urban Governance and Development* is a multidisciplinary volume that aims to open up these debates, extending them empirically and questioning the dominant discussions of governance and development that have been rooted largely or entirely in the realm of licit and legal actors. The book investigates these issues with reference to a variety of different

geographical contexts, including, but not limited to, places traditionally considered to be associated with illegal activities and extensive illicit markets, such as some regions in the so-called Global South. The chapters consider the ways in which these questions deeply affect the daily lives of several cities and regions in some advanced countries. Their comparative perspectives will demonstrate that the illicit and the illegal are an underappreciated structural aspect of current urban and regional governance and development across the globe. The book is an edited collection of research-informed essays, which will primarily be of interest to those taking advanced undergraduate and taught postgraduate courses in human geography, urban and regional planning and a range of social science disciplines that have an interest in urban and regional issues and issues related to crime and corruption.

Since the 1990s, city branding has become a key factor in urban development policies. Cities all over the world take specific actions to manipulate the imagery and the perceptions of places, both in the eyes of the inhabitants and in those of potential tourists, investors, users and consumers. *City Branding: The Ghostly Politics of Representation in Globalising Cities* explores different sides of place branding policies. The construction and the manipulation of urban

images triggers a complex politics of representation, modifying the visibility and the invisibility of spaces, subjects, problems and discourses. In this sense, urban branding is not an innocent tool; this book aims to investigate and reflect on the ideas of urban life, the political unconscious, the affective geographies and the imaginaries of power constructed and reproduced through urban branding. This book situates city branding within different geographical contexts and 'ordinary' cities, demonstrated through a number of international case studies. In order to map and contextualise the variety of urban imaginaries involved, author Alberto Vanolo incorporates conceptual tools from cultural studies and the embrace of an explicitly post-colonial perspective. This critical analysis of current place branding strategy is an essential reference for the study of city marketing.

Jerusalem has for centuries been known as the spiritual center for the three largest monotheistic religions: Judaism, Christianity and Islam. Yet Jerusalem's other-worldly transcendence is far from the daily reality of Jerusalem, a city bombarded by conflict. The battle over who owns and controls Jerusalem is intensely disputed on a global basis. Few cities rival Jerusalem in how its divisions are expressed in the political sphere and in ordinary everyday life. Jerusalem: The Spatial

Politics of a Divided Metropolis is about this constellation of competing on-the-ground interests: the endless set of claims, struggles, and debates over the land, neighborhoods, and communities that make up Jerusalem. Spatial politics explain the motivations and organizing around the battle for Jerusalem and illustrate how space is a weapon in the Jerusalem struggle. These are the windows to the world of the Israel-Palestine conflict. Based on ninety interviews, years of fieldwork, and numerous Jerusalem experiences, this book depicts the groups living in Jerusalem, their roles in the conflict, and their connections to Jerusalem's development. Written for students, scholars, and those seeking to demystify the Jerusalem labyrinth, this book shows how religion, ideology, nationalism, and power underlie patterns of urban development, inequality, and conflict.
