(pronounced C-sharp). Through its first year, SharpCap remained a fairly simple webcam capture application that was designed to be easy to use, to use standard, familiar Windows UI elements and to show the controls for the camera to the user at all times. This seemed to be enough of an improvement over the

Micro Saint Sharp is a general purpose, discrete-event simulation software tool. Micro Saint Sharp's intuitive graphical user interface and flow chart approach to modeling make it a tool that can be used by generalists as well as simulation experts. Micro Saint Sharp has proven to be an invaluable asset in both small businesses and Fortune 500 companies and in many areas including the military, human factors, health care, manufacturing, and the service industry. The user manual has been updated for software version 3.8. Some new features are

the ability to add swim lanes to any network background, data exchange capability with the UML/SysML tool MagicDraw, and a updated version of the built-in OptQuest optimization.

Developing strong word processing skills has never been easier and more fun. Skill Building Pro is a fully integrated text and software program that includes 60 lessons of instruction as well as self-paced writings, drill practice, timed writings with error diagnostics, games for building skill, and a word processor. This versatile skill-development program combines keying from the textbook and computer screen to provide well-rounded practice for improving keyboarding skills. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This book de-mystifies the jargon of webcams and computer processing, and provides detailed

Online Library Sharp User Guide

hints and tips for imaging the Sun, Moon and planets with a webcam. It demonstrates how inexpensive tools are revolutionizing imaging in amateur astronomy. Anyone with a modest telescope and a webcam can now obtain jaw-dropping lunar and planetary images to rival those taken with mid-range astronomical CCD cameras costing thousands of dollars. A glance through the images in this book shows just what spectacular results can be achieved by using a webcam with your telescope! Your scientific results will be sought by professional astronomers.
