Deconstructing the Albino Other: A Critique of Albinism Identity in Media discusses how American popular culture and communication about albinism, including movie characters and memes, have worked to create and maintain a negative trope of albinism that situates people with albinism (PWA) as a monolithic other. Niya Pickett Miller demonstrates that consequently, PWA must construct their own identities of albinism, highlighting the salient aspects of themselves as they see fit with no valid representation to look to for guidance. Thus, Pickett Miller argues, self-defining for PWA is a key rhetorical action taken to rearticulate albinism identity. Rather than focusing on scientific and medical lenses of analysis, this book positions albinism as a social construct through which a broader understanding of otherness can be achieved, using the negative influence of pop culture's otherization of PWA as a case study with broader implications, including how medical conditions can be visually troped to isolate the other outside of society's realm of normalcy. Scholars of media studies, race studies, sociology, rhetoric, and the medical humanities will find this book particularly useful.

Most members of the Stolen Generations had white fathers or grandfathers. Who were these white men? This book analyses the stories of white fathers, men who were positioned as key players in the plans to assimilate Aboriginal people by 'breeding out the colour'. The plan to 'breed out the colour' ascribed enormous power to white sperm and white paternity; to 'elevate', 'uplift' and disperse Aboriginality in whiteness, to blank out, to aid cultural forgetting. The policy was a cruel failure, not least because it conflated skin colour with culture and assumed that Aboriginal women and their children would acquiesce to produce 'future whites'. It also assumed that white men would comply as ready appendages, administering 'whiteness' through marriage or white sperm. This book attempts to put textual flesh on the bodies of these white fathers, and in doing so, builds on and complicates the view of white fathers in this history, and the histories of whiteness to which they are biopolitically related.
