Discover the mysteries of science with Future Geniuses! Come along with Valentina, the astronaut, on this incredible journey to Mars and become a space genius! Up past the exosphere, thermosphere, and mesosphere, we will find outer space and learn the answers to some big questions. What is the ozone layer? What is gravity? Which countries have successfully traveled into space? What are the parts of rockets called, and what does each part do? What is space like? Future Geniuses is a collection that will help families spend a lot of time reading and learning together. Through simple text and fun illustrations, author and scientist Carlos Pazos makes the subjects of space and space travel approachable and easy to understand for even the smallest scientists.

Discover the mystery of science with Future Geniuses! Join Valentia, the little scientist, and her cat, Plank, as they learn why Plank can never seem to catch the laser he loves to play with. To do this, they must shrink down to the smallest size imaginable. Once they ' re tiny, they can better learn about quantum physics, discovering secrets that are invisible to those of us who are full sized! Valentina teaches Plank all about molecules, atoms, particles, photons, and matter., as well as solids, liquids, and gasses—and fusion and fission! Future Geniuses is a collection that will help families spend time reading and learning together. Through simple text and fun illustrations, author and scientist Carlos Pazos makes the subjects of quantum physics approachable and easy to understand for even the smallest scientists.

A large-format introduction to the flora and fauna of the planet's rainforests combines striking, close-up photographs with easy-to-comprehend facts about plant and animal life.

With full-color, close-up photos of reptiles and other fascinating creatures, this large-format book is ideal for school projects and makes learning fun.

Discover the mystery of science with Future Geniuses! Little Doctor Valentina is back with a brand new adventure! This time, join Valentina as she explains the concept of genetics, using her adorable puppy, Mendel, as her model. With her handy microscope, Valentina examines Mendel ' s cells and teaches us all about cell parts—organelles, membranes, cytoplasm, and finally, the powerhouse of the cell, the nucleus. Within the nucleus, Valentina points out the DNA and the genes that explain everything about us—like why Mendel is yellow and his siblings are brown! Dive deep into the world of genetics and learn all about nitrogen bases, RNA, chromosomes, mitosis, and more. Uncover what makes you, well, you! Future Geniuses is a collection that will help families spend a lot of time reading and learning together. Through simple text and fun illustrations, author and scientist Carlos Pazos makes the subject of genetics approachable and easy to understand for even the smallest scientists.

What body parts can many lizards lose and grow back? Oddly enough, a lizard can grow back it's tail after it has been completely lost or cut off! If you like interesting and interactive trivia questions like this, then keep reading... So, are you ready to test your skills and see what you know about all different kinds of trivia? Then scroll up and click the " Add to Cart" button now!

Why does my child seem to worry so much? Being the parent of a smart child is great—until your son or daughter starts asking whether global warming is real, if you are going to die, and what will happen if they don't get into college. Kids who are advanced intellectually often let their imaginations ruin wild and experience fears beyond their years. So what can you do to help? In Why Smart Kids Worry, Allison Edwards guides you through the mental and emotional process of where your child's fears come from and why they are so hard to move past. Edwards focuses on how to parent a child who is both smart and anxious and brings her years of experience as a therapist to give you the answers to questions such as: • How do smart kids think differently? • Should I let my child watch the nightly news on TV? • How do I answer questions about terrorists, hurricanes, and other scary subjects? Edwards's fifteen specially designed tools for helping smart kids manage their fears will help you and your child work together to help him or her to become more relaxed and worry-free.

Presents more than 100 wild and wacky facts about space exploration.
