The medical specialty of paediatric gastroenterology is focused on problems and disorders within the gastrointestinal tract, liver and pancreas of children from infancy until age eighteen. This inspirational compilation provides information on current research and clinical practice regarding the psychosocial aspects of paediatric gastrointestinal c

A compact, “how-to” manual on effective, evidence-based treatments for enuresis and encopresis. The aim of this book is to provide readers with a practical overview of the definitions, characteristics, theories and models, diagnostic and treatment recommendations, and relevant aspects and methods of evidence-based psychosocial treatments for encopresis and enuresis, primarily in children. Although treatments and research for elimination disorders are reviewed in general, particular attention is directed at constipation and encopresis, toileting refusal, and diurnal and nocturnal enuresis due to the high incidence of these conditions in children. Case vignettes, websites, and suggestions for further reading are provided for the interested reader.

Offers techniques for helping chronically inflexible children, shows how brain-based deficits contribute to these problems, and suggests ways to calm things down.

“Straight up, parent tested, and funny to boot, Jamie gives you all the information you need.” —Amber Dusick, author of *Parenting: Illustrated with Crappy Pictures* A proven six-step plan to help you toilet train your preschooler quickly and successfully, from potty-training expert, Pied Piper of Poop, and social worker Jamie Glowacki. Worried about potty training? Let Jamie Glowacki, potty-training expert, show you how it’s done. Her 6-step, proven process to get your toddler out of diapers and onto the toilet has already worked for tens of thousands of kids and their parents. Here’s the good news: your child is probably ready to be potty trained EARLIER than you think (ideally, between 20–30 months), and it can be done FASTER than you expect (most kids get the basics in a few days—but Jamie’s got you covered even if it takes a little longer). If you’ve ever said to yourself: ** How do I know if my kid is ready? ** Why won’t my child poop in the potty? ** How do I avoid “potty power struggles”? ** How can I get their daycare provider on board? ** My kid was doing so well—why is he regressing? ** And what about nighttime?! Oh Crap! Potty Training can solve all of these (and other) common issues. This isn’t theory, you’re not bribing with candy, and there are no gimmicks. This is real-world, from-the-trenches potty training information—all the questions and all the ANSWERS you need to do it once and be done with diapers for good.

A step-by-step program for curing bedwetting, with separate sections for parent and child.

Combines psychological/medical assessment and treatment to provide a holistic approach for managing this disorder. Begins with an extensive review of international literature on the subject covering causation theories and curative studies. Explains how to assess the “whole child” plus his/her family along with the treatment and management of the problem using the “whole child” method. Describes neurological disorders associated with soiling, its relationship with sexual abuse, the wider implications from research and suggested ways of setting up specific services for the soiling child.
