Set on the eve of the First World War, across oceans and continents, steamliners and cross-country trains, David Downing's complex and thrilling new espionage novel takes us all the way back to the dawn of that most fascinating of 20th century characters:the spy. It is 1913, and those who follow the news closely can see the world is teetering on the brink of war. Jack McColl, a Scottish car salesman with an uncanny ear for languages, has always hoped to make a job for himself as a spy. As his sales calls take him from city to great city:Hong Kong to Shanghai to San Francisco to New York,the moonlights collecting intelligence for His Majesty's Secret Service, but British espionage is in its infancy and Jack has nothing but a shoestring budget and the very tenuous protection of a boss in far-away London. He knows, though, that a geopolitical catastrophe is brewing, and now is both the moment to prove himself and the moment his country needs him most. Unfortunately, this is also the moment he begins to realize what his aspiration might cost him. He understands his life is at stake when activities in China suddenly escalate from innocent data-gathering and casual strolls along German military concessions to arrest warrants and knife attacks. Meanwhile, a sharp, vivacious American suffragette journalist has wiled her way deep into his affections, and it is not long before he realizes that her Irish-American family might be embroiled in the Irish Republican movement Jack's bosses are fighting against. How can he choose between his country and the woman he loves? And would he even be able to make such a choice without losing both?

Written as a companion volume to the earlier'World's Greatest Military Spies and Secret Service Agents', (George Barton's 1919 work examines espionage during the Great War. In addition to covering the exploits of World War I's greatest spies, the work also investigates various mysteries and adventures associated with the conflict. Photographs and illustrations of various personalities enliven the account.

Best-selling author James Morton tells the story of organized espionage in Britain from spy fever early in the 20th century to the end of the First World War and the rise of air intelligence. He introduces us to a world of colorful characters and dark underhand dealing in which spies, male and female, driven by love, money, patriotism or a mix of all of them, struggled to survive. The first English officer spies are featured alongside their frequently flamboyant French, Belgium and German counterparts - from the hunchback dentist Wilhelm Klauer to the 'Grande (and lesser) horizontales' such as Mata Hari. So too are their controllers such as authors John Buchan and Somerset Maugham and men like Richard Tinsley who oversaw a network of some 2000 spies from Holland. As professionalism grew great successes emerged - not least the deciphering of the intercepted Zimmerman telegram - along with notable failures. Morton tackles both in a meticulously researched narrative that balances the history of espionage with the human stories of individuals and tales of heroism with cowardice, incompetence and betrayal.

When the United States declared war on Germany in April 1917, it was woefully unprepared to wage a modern war. Whereas their European counterparts already had three years of experience in using code and cipher systems in the war, American cryptologists had to help in the building of a military intelligence unit from scratch. This book relates the personal experiences of one such character, providing a uniquely American perspective on the Great War. It is a story of spies, coded letters, plots to blow up ships and munitions plants, secret inks, arms smuggling, treason, and desperate battlefield messages. Yet it all begins with a college English professor and Chaucer scholar named John Mathews Manly. In 1927, John Manly wrote a series of articles on his service in the Code and Cipher Section (MI-8) of the U.S. Army's Military Intelligence Division (MID) during World War I. Published here for the first time, enhanced with references and annotations for additional context, these articles form the basis of an exciting exploration of American military intelligence and counter-espionage in 1917-1918. Illustrating the thoughts of prisoners of war, draftees, German spies, and ordinary Americans with secrets to hide, the messages deciphered by Manly provide a fascinating insight into the state of mind of a nation at war.

In this 'stunning literary achievement,' Donner chronicles the extraordinary life and brutal death of her great-great-aunt Mildred Harnack, the American leader of one of the largest underground resistance groups in Germany during WWII:
a page-turner story of espionage, love and betrayal!
(Kai Bird, winner of the Pulitzer Prize for Biography)
Born and raised in Milwaukee, Mildred Harnack was twenty-six when she enrolled in a PhD program in Germany and witnessed the meteoric rise of the Nazi party. In 1932, she began holding secret meetings in her apartment;a small band of political activists that by 1940 had grown into the largest underground resistance group in Berlin. She recruited working-class Germans into the resistance, helped Jews escape, plotted acts of sabotage, and collaborated in writing leaflets that denounced Hitler and called for revolution. Her cocoonspirators circulated through Berlin under the cover of night, slipping the leaflets into mailboxes, public restrooms, phone booths. When the first shots of the Second World War were fired, she became a spy, courting top-secret intelligence to the Allies. On the eve of her escape to Sweden, she was ambushed by the Gestapo. At a Nazi military court, a panel of five judges sentenced her to six years at a prison camp, but Hitler overruled the decision and ordered her execution. On February 16, 1943, she was strapped to a guillotine and beheaded. Historians identify Mildred Harnack as the only American in the leadership of the German resistance, yet her remarkable story has remained almost unknown until now. Harnack's great-great-niece Rebecca Donner draws on her extensive archival research in Germany, Russia, England, and the U.S. as well as newly uncovered documents in her family archive to produce this astonishing work of narrative nonfiction. Fusing elements of biography, real-life political thriller, and scholarly detective story, Donner brilliantly interweaves letters, diary entries, notes smuggled out of a Berlin prison, survivors' testimony, and a trove of declassified intelligence documents into a powerful, epic story, reconstructing the moral courage of an enigmatic woman nearly erased by history.

On His Majesty's Secret Service
The Duke of Wellington famously said that the art of war was discovering what you don't know by what you do-guessing what was on the other side of the hill. The best way to know what was over that hill was to send someone to look for you. The duke was no stranger to scouts, spies and intelligence officers and knew their value. As important as the spying itself was the need to stop enemy agents employed in the same work. By the later 19th century the means by which intelligence work could be undertaken was as a result of developments in communication, transport and technology in all its forms becoming more sophisticated. Countermeasures likewise became more difficult and complex. The decision made by many governments was to formalise the operations of espionage and counterespionage agents into dedicated services. This book, by a member of the British Secret Service, offers an essential insight into intelligence activities during the Great War. The narrative includes the riveting personal experiences and anecdotes of other agents, touches upon the methods used including codes and locating minirelays, and gives an overview of the secret service organisations operating at that time; it concludes with an examination of the 'Casement Affair.' For those interested in the world of the proto-Bond against Imperial Germany this is a highly entertaining read.

Known as 'the Great War,' the world's first truly global conflict is remarkable in what might now be termed modern espionage. World War I was witness to plenty of 'firsts.' Apart from the contribution made by aerial reconnaissance and the interception of wireless telegraphy, telephone and cable traffic, there was the scientific aspect, with new machines of war, such as the submarine, sea-mine, torpedo, airship, barbed wire, armored tank and mechanized cavalry in a military environment that included mustard gas, static trench warfare, the indiscriminate bombardment of civilian population centers and air-raids. Large-scale sabotage and propaganda, the manipulation of news and of radio broadcasts, and censorship, were all features of a new method of engaging in combat, and some ingenious techniques were developed to exploit the movement of motor and rail transport, and the transmission of wireless signals. The hitherto unknown disciplines of train-watching, bridge-watching, airborne reconnaissance and radio interception would become established as routine collection methods, and their impact on the conflict would prove to be profound. The Historical Dictionary of World War I Intelligence relates this history through a chronology, an introductory essay, an appendix, and an extensive bibliography. The dictionary section has over 400 hundred cross-referenced entries on intelligence organizations, the spies, and the major cases and events of World War I. This book is an excellent access point for students, researchers, and anyone wanting to know more about the world of intelligence in World War I.
