Xavier Horan brings te reo Māori to Shortland Street

And so began Osaka's downward spiral. She fell behind 5-0 in the ensuing tiebreaker, missing shots and displaying her frustration as she occasionally has done in the past — by flinging her racket.

Beating the Odds

Being who we truly are is the key to authenticity. A Spiral of Being reveals the personal journey of the author to find out who she truly is – a journey that is taken consciously or subconsciously by all people. It is a deep search for authenticity and meaning. Throughout the book the reader is taken beyond the surface of things to the depths of his or her being to the interconnectedness of all living things. The seven sections are: Being Who I am Being Children, Families and Parents Being Friends and Acquaintances Being In Community Being Aware of Events and Happenings Being Alive Glimpses of Being. A Spiral of Being takes readers, through poetry, into new thoughts, new perspectives, stimulating questions and refreshing approaches to the challenges of life and the joy of being alive and thereby inspiring their own search for answers to these universal questions.

Plants exhibit forms of asymmetry analogous to "handedness" in bilaterally symmetrical animals. This book explores the evolutionary significance and development of asymmetry. Examples of genetic control include the direction of tendril or stem coiling of many climbing plants; the so-called spiral phyllotaxy and floral taxy; and contorted petal arrangement is another kind of left- right symmetry in plants; the direction of contortion is fixed in some but not in other plants. The book will underscore tha all phenomena related to handedness start during embryogenesis itself, with the occurrence of embryo rotation. Key selling features: First consolidated book on Plant Handedness Relates handedness, asymmetry and chirality to the evolution of different organizational levels in plant biology Emphasizes handedness as a vital governing force in plant functional evolution Provides a new perspective, hitherto ignored, into plant developemtn and evolution Describes how an age-old phenomenon can give scope for investigation from a very modern interdisciplinary approach

From the tiny twisted biological molecules to the gargantuan curling arms of many galaxies, the physical world contains a startling repetition of spiral patterns. Today, researchers have a keen interest in identifying, measuring, and defining these patterns in scientific terms. Spirals play an important role in the growth processes of many biological forms and organisms. Also, through time, humans have imitated spiral motifs in their art forms, and invented new and unusual spirals which have no counterparts in the natural world. Therefore, one goal of this multi-authored book is to stress the conspicuous role that spirals play in science, and to show the reader how to create such spirals using a computer. Another goal is to show how simple mathematical formulas can reveal magnificent shapes and images. This interdisciplinary book revolves around a common theme, spiral symmetry, and is intended for scientists, humanists, and interested laypeople. Contents: The Spiral in Nature, Myth, and Mathematics (J Kappraf)Does the Golden Spiral Exist, and if not, where is its Center (A L Loeb & W Warney)Pythagorean Spirals (E J Eckert)Dynamical Spirals (A V Holden)Random Spirals (W A Seltz & D J Klein)Spiral Galaxies (B G Elmegreen)Spiral-Based Self-Similar Sets (K Wicks)Symmetry and Spirals: An Artist's Personal Statement (R Newman)Spiral Structures in Julia Sets and Related Sets (M Micheltisch & O E Rössler)Electromagnetic Theory of Chiral Media (A Lakhtakia)Isometric Systems in Isotropic Space: An Artist's Personal Statement on Spiral and other Map Projections (A Denes)On the Origins of Spiral Symmetry in Plants (R V Jean)and other papers Readership: Scientists, humanists and interested laypeople. keywords:Spirals;Symmetry;Fractals;Computer Graphics;Computer Art;Botany;Mathematics;Phyllotaxis;Beauty;Aesthetics;Nature

A treatise on the laws governing proportional form in both nature and the arts and sciences, this well-illustrated volume demonstrates how a design can captivate both the eye and the mind. Flowers and shells appear here, along with artistic creations, in a study of the similarity of their constructive principles.

Designing the Future

Contemporary Architecture and the Digital Design Process introduces the reader to new developments in the computer modelling of design form in contemporary architectural practice through a series of detailed case studies. The book illustrates how evolving design practices use and exploit the potential of new computing technologies in a wide range of areas and application. A central thesis of this book is that technology follows design demand, rather than design adjusting to available new technology. Designers are not merely passive recipients of prescribed computing tools and techniques. Instead, they are increasingly able to express their intuitive design ideas through the rational medium of computing. The book features several contemporary building projects, each of which introduces a range of CAD and computing issues based upon the work of creative architectural and engineering design practices. These include the offices of Frank O. Gehry, Peter Cook and Colin Fournier, Anthony Hunt Associates, Peter Hubner, Szyskowitz-Kowalski, and Faulkner Brown. All these examples show what architects need to know and the skills they need to acquire to use advanced CAD technology.

What was the golden secret known to Leonardo da Vinci, Kepler, Plato and the ancient magicians? Can there really be a key to nature and life itself? In this small but compact volume internationally renowned divine proportion supersleuth Dr Orsen unravels perhaps the greatest mystery of all time, a code that seems to underly life, the universe and everything, a pattern we instinctively recognise as beautiful, and which nature herself uses at every scale. Designed for artists and scientists alike, this is the smallest, densest and most beautiful book on the golden section ever produced. WOODEN BOOKS are small but packed with information. This book is a compilation of the authentic Brotherhood of Light Lessons by C. C. Zain. It contains over 5000 pages and all 23 volumes of the 21 Brotherhood of Light Course series. Divided into three branches of study: Astrology, Alchemy and Magic (which includes the tarot and kabbalah), there are seven courses in each branch. Zain integrates these fields of study into a unified understanding of how a student may apply Hermetic tradition and principles to build character, attract desired events into the life and significantly increase one's happiness, usefulness and spirituality. Only authentic Brotherhood of Light lessons by C. C. Zain can bear the trademark of the two interlaced trines, with the name of Deity in the center and astrological symbols around the outside. The Brotherhood of Light is a modern-day Mystery School Tradition which offers a self-paced, home study course in Hermeticism. The goal of The Brotherhood of Light teachings is to create a world in which the dominant motivation of individuals is for Universal Welfare. That is, an ideal society that protects freedom of expression and worship, while simultaneously offering the tools by which freedom from want and fear can be achieved. We believe that this better world can be attained by becoming familiar with the facts of astrology, extra-sensory perception, directed-thinking and induced emotion, all taught in The Brotherhood of Light Lessons. The study and application of these teachings provides the aspirant with the tools to experience greater happiness, and spirituality, and to discover his or her role in God's Great Plan. This book integrates the following publications into one document: CS01 Laws of Occultism: Inner Plane Theory and the Fundamentals of Psychic Phenomena CS02 Astrological Signatures: Evolution of the Soul and the Nature of Astrological Energies CS03 Spiritual Alchemy: The Hermetic Art of Spiritual Transformation CS04 Ancient Masonry: The Spiritual Meaning of Masonic Degrees, Rituals and Symbols CS05 Esoteric Psychology: Success through Directed Thinking and Induced Emotion CS06 The Sacred Tarot: The Art of Card Reading and the Underlying Spiritual Science CS07 Spiritual Astrology: The Origins of Astro-Mythology and Stellar Religion CS08 Horary Astrology: How to Erect and Judge a Horoscope CS09 Mental Alchemy: How Thoughts and Feelings Shape Our Lives CS10-1 Natal Astrology: Delineating the Horoscope CS10-2 Natal Astrology: Progressing the Horoscope CS11 Divination and Character Reading: Tools and Techniques for Enhancing ESP CS12-1 Natural Alchemy: Evolution of Life CS12-2 Natural Alchemy: Evolution of Religion CS13 Mundane Astrology: Interpreting Astrological Phenomena for Cities, Nations and Groups CS14 Occultism Applied to Daily Life: How to Increase Your Happiness, Usefulness and Spirituality CS15 Weather Predicting: The Hermetic System of Astrological Weather Analysis CS16 Stellar Healing: Astrological Predisposition, Diagnosis and Treatment of Disease CS17 Cosmic Alchemy: The Spiritual Guide to Universal Progression CS18 Imponderable Forces: The Wholesome Pathway CS19 Organic Alchemy: The Universal Laws of Soul Progression CS20 The Next Life: A Guide to Living Conditions on the Inner Plane CS21: Personal Alchemy: The Neophyte's Path to Spiritual Attainment

Have you ever stared at patterned wallpaper and wondered how it was designed? Been captivated by some priceless Celtic art? Or boggled at a beautiful Islamic pattern? Have you ever stepped back and thought about the illusion of reality your senses create for you? Or pondered the symmetries which inform your feelings of what seems right? Is there a Golden secret, revealed by nature herself, which is common to all of the traditional arts? Packed with information and exquisite illustrations by more than twelve expert authors, Design is the ultimate sourcebook for visual artists and designers of every kind.
