What drives so many to leave everything behind and journey alone to a mysterious country, a place without family or friends, where everything is nameless and the future is unknown. This silent graphic novel is the story of every migrant, every refugee, every displaced person, and a tribute to all those who have made the journey.

“WE NEED TO TALK.” In this urgent and insightful book, public radio journalist Celeste Headlee shows us how to bridge what divides us--by having real conversations **BASED ON THE TED TALK WITH OVER 10 MILLION VIEWS** NPR's Best Books of 2017 Winner of the 2017 Silver Nautilus Award in Relationships & Communication “We Need to Talk is an important read for a conversationally-challenged, disconnected age. Headlee is a talented, honest storyteller, and her advice has helped me become a better spouse, friend, and mother.” (Jessica Lahey, author of New York Times bestseller *The Gift of Failure*) Today most of us communicate from behind electronic screens, and studies show that

Americans feel less connected and more divided than ever before. The blame for some of this disconnect can be attributed to our political landscape, but the erosion of our conversational skills as a society lies with us as individuals. And the only way forward, says Headlee, is to start talking to each other. In *We Need to Talk*, she outlines the strategies that have made her a better conversationalist—and offers simple tools that can improve anyone’s communication. For example: **BE THERE OR GO ELSEWHERE**. Human beings are incapable of multitasking, and this is especially true of tasks that involve language. Think you can type up a few emails while on a business call, or hold a conversation with your child while texting your spouse? Think again. **CHECK YOUR BIAS**. The belief that your intelligence protects you from erroneous assumptions can end up making you more vulnerable to them. We all have blind spots that affect the way we view others. Check your bias before you judge someone else. **HIDE YOUR PHONE**. Don’t just put down your phone, put it away. New research suggests that the mere presence of a cell phone can negatively impact the quality of a conversation. Whether you’re struggling to communicate with your kid’s teacher at school, an employee at work, or the people you love the most—Headlee offers smart strategies that can help us all have conversations that matter.

"HELP! My Students Can't Write!" Why You Need a Writing Revolution in Your Classroom and How to Lead It. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, TWR can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities TWR is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this

different from non-experts? What can teachers and schools do--with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.
