Stanhope and Lancaster (2008) states: "The  
community is the client only when the nursing  
focus is on the collective or common good of  
the population instead of on individual  
health" (pg. 44) and "Although the nurse may

Stanhope & Lancaster (2008) explain that people in a phenomenological community “have a group perspective that differentiate them from other groups”. The members of this community share similar characteristics, goals, ideas, religion, race, values, or beliefs. Community health nurses provide care to culturally diverse people. Culture

The Friedman Family Assessment Model draws heavy on the structure-function framework and on developmental as system theory. The model takes a broad approach to family assessment, which views families as a subsystem of society. The family is viewed as an open social system ((Stanhope & Lancaster, 2008).

Historically, community health nursing has  
responded to the changing health care needs  
of the community and continues to meet those

# Acces PDF Stanhope M Lancaster J 2008 Community Health Nursing In Canada First

needs in a variety of diverse roles and settings. Community Health Nursing: Caring for the Public's Health, Second Edition reflects this response and is representative of what communities signify in the United States--a unified society made up of many different populations and unique health perspectives. This text provides an emphasis on population-based nursing directed toward health promotion and primary prevention in the community. It is both community-based and community-focused, reflecting the current dynamics of the health care system. The Second Edition contains new chapters on
