We believe this work is culturally important, and despite the imperfections, have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide. We appreciate your understanding of the imperfections in the preservation process, and hope you enjoy this valuable book.

The commedia dell'arte, the improvised Italian theatre that dominated the European stage from 1550 to 1750, is arguably the most famous theatre tradition to emerge from Europe in the early modern period. Its celebrated masks have come to symbolize theatre itself and have become part of the European cultural imagination. Over the past twenty years a revolution in commedia dell'arte scholarship has taken place, generated mainly by a number of distinguished Italian scholars. Their work, in which they have radically separated out the myth from the history of the phenomenon remains, however, largely untranslated into English (or any other language). The present volume gathers together these Italian and English-speaking scholars to synthesize for the first time this research for both specialist and non-specialist readers. The book is structured around key topics that span both the early modern period and the twentieth-century reinvention of the commedia dell'arte.

Following the tradition and style of the acclaimed *Index Islamicus*, the editors have created this new *Bibliography of Art and Architecture in the Islamic World*. The editors have surveyed and annotated a wide range of books and articles from collected volumes and journals published in all European languages (except Turkish) between 1906 and 2011. This comprehensive bibliography is an indispensable tool for everyone involved in the study of material culture in Muslim societies.

Despite Burlington's fame, surprisingly little has been written about him. *Lord Burlington: Architecture, Art and Life* presents a modern reassessment of his career, while setting him in a broader context than has usually been the case, to reflect both his interests outside architecture and to present his character in the round. Architecture is given pride of place, but his other interests, in land-owning, politics and literature, are also examined, throwing much new light on an exceptionally significant and attractive figure.

Perhaps more than any other collector of his generation in the United States, Robert Lehman was interested in acquiring early drawings. He made a great effort to add drawings to the collection of paintings, sculpture, ceramics, glass, and other objects that his father, Philip Lehman, had begun assembling. The 116 Italian drawings analyzed and discussed in this volume are among the more than 2,000 works of art from the collection now housed in the Robert Lehman Wing of The Metropolitan Museum of Art. Robert Lehman's collection demonstrates the variety of drawings produced in Italy from the fifteenth to the seventeenth century, a period when the purposes and techniques of drawings, as well as the aims and abilities of the artist who made them, became increasingly sophisticated. The volume includes an elaborate design for an equestrian monument by Antonio Pollaiuolo, a magnificent study of a bear by Leonardo da Vinci, a cartoon by Luca Signorelli, a study for a vault fresco by Taddeo Zuccaro, and many other drawings that are among the best Italian examples to have survived from that era. Most types of drawings, in a wide variety of techniques, are represented{u2014}figure studies, grand compositions, landscapes, cartoons, modelli, and even sculptors' studies. -- Metropolitan Museum of Art website.

In doing so, it examines the art of Florence in the 1440s and the work of, among others, Fra Filippo Lippi, Domenico Veneziano, Luca della Robbia, and Michelozzo."--BOOK JACKET.
