Satyam means truth. It couldn ' t have been more ironic for Satyam Computer Services to have its chairman and founder. Satyam was the brand image of Andhra Pradesh. Hyderabad (the capital of the state) was identified with this company, and its founder-chairman B. Ramalinga Raju was a hero to youngsters. But overnight, arguably the biggest fraud in India ' s corporate history has reduced the chairman and his company to a big zero.

Throughout the book, theoretical foundations necessary for understanding Electronic Commerce (EC) are presented, ranging from consumer behavior to the economic theory of competition. Furthermore, this book presents the most current topics relating to EC as described by a diversified team of experts in a variety of fields, including a senior vice president of an e-commerce-related company. The authors provide website resources, numerous exercises, and extensive references to supplement the theoretical presentations. At the end of each chapter, a list of online resources with links to the websites is also provided. Additionally, extensive, vivid examples from large corporations, small businesses from

different industries, and services, governments, and nonprofit agencies from all over the world make concepts come alive in Electronic Commerce. These examples, which were collected by both academicians and practitioners, show the reader the capabilities of EC, its cost and justification, and the innovative ways corporations are using EC in their operations. In this edition (previous editions published by Pearson/Prentice Hall), the authors bring forth the latest trends in e-commerce, including social businesses, social networking, social collaboration, innovations, and mobility.

The technical resources, budgets, curriculum, and profile of the student body are all factors that play in implementing course design. Learning management systems administrate these aspects for the development of new methods for course delivery and corresponding instructional design. Learning Management Systems and Instructional Design: Best Practices in Online Education provides an overview on the connection between learning management systems and the variety of instructional design models and methods of course delivery. This book is a useful source for administrators, faculty, instructional designers, course developers, and businesses interested in the technological solutions and methods of online education.

While the general agreement in education remains that the more senses involved in learning, the better we learn; the question still remains as to the distinction between the education of children and the education of adults. Handbook of Research on Teaching and Learning in K-20 Education provides well-rounded research in providing teaching and learning theories that can be applied to both adults and children while acknowledging the difference between

both. This book serves as a comprehensive collection of expertise, research, skill, and experiences which will be useful to educators, scholars, and practitioners in the K-12 education, higher education, and adult education field.

Covers the priorities and challenges facing organisations who are increasingly focused on ' knowledge work ' ; it is written from a human relations – rather than a technological - perspective. It uses real cases, backed up by evidence and analysis from a detailed study into strategic knowledge based working (KBW). The content of the book draws on two chief sources: the author ' s own expertise in KBW developed over five years of blue chip KBW consultancy, and the results of a previously unpublished five year study. The book offers clear, step-by-step guidance to executives who need to understand, deploy and implement KBW. Outlines the key challenges for KBW at all organisational levels Self assessment questions at the end of each of the four chapters Interchapter case studies for in depth teaching/understanding
