This book explores multilingualism as an imaginative articulation of the experience of modernity in twentieth-century Spanish and American literature. It argues that while individual multilingual practices are highly singular, literary multilingualism exceeds the conventional bounds of modernism to become emblematic of the modern age. The book explores the confluence of multilingualism and modernity in the theme of barbarism, examining the significance of this theme to the relationship between language and modernity in the Spanish-speaking world, and the work of five authors in particular. These authors – Ramón del Valle-Inclán, Ernest Hemingway, José María Arguedas, Jorge Semprún and Juan Goytisolo – explore the stylistic and conceptual potential of the interaction between languages, including Spanish, French, English, Galician, Quechua and Arabic, their work reflecting the eclecticism of literary multilingualism while revealing its significance as a mode of response to modernity.

What habits are common among good college writers? Good college writers are curious, engaged, reflective, and responsible. They read critically. They write with purpose. They tune into their audience. They collaborate and seek feedback. They know credible evidence makes them credible researchers. They revise. The Bedford Handbook, based on surveys with more than 1,000 first-year college students, fosters these habits and offers more support than ever before for college reading and writing. New writing guides support students as they compose in an ever-wider variety of genres, including multimodal genres. New reading support encourages students to become active readers. Retooled research advice emphasizes inquiry and helps writers cite even the trickiest digital sources confidently and responsibly. Best of all, the Handbook remains a trusted companion for students because it is accessible, comprehensive, and authoritative. Instructors benefit, too. A substantially revised Instructor's Edition includes Nancy Sommers's personal mentoring—more than 100 new concrete tips for teaching with the handbook. Finally, integrated digital content is easily assignable and helps students practice and apply the handbook's lessons.

Dallas has a reputation as a progressive city—always ready to build something new to replace the old. In the late 19th century, as Dallas became the transportation and commercial center for North Texas, brick and stone edifices supplanted the simple frame structures of the early days. By the 1920s, the city was the financial capital of the region and boasted the tallest building west of the Mississippi. In 1936, Dallas hosted the Texas Centennial Exposition in Fair Park, an ensemble of art deco buildings that is a National Historic Landmark. As business grew, so did the skyline. Today Dallas has a rich collection of historic buildings that chronicle the city's growth and progress.

A revised new edition of the bestselling toolkit for creating, building, and maintaining a strong brand From research and analysis through brand strategy, design development through application design, and identity standards through launch and governance, Designing Brand Identity, Fourth Edition offers brand managers, marketers, and designers a proven, universal five-phase process for creating and implementing effective brand identity. Features more than 30 all-new case studies showing best practices and world-class Updated to include more than 35 percent new material Offers a proven, universal five-phase process and methodology for creating and implementing effective brand identity

Famous Trees of Texas was first published in 1970 by the Texas Forest Service (now Texas A&M Forest Service), an organization created in 1915 and charged with protecting and sustaining the forests, trees, and other related natural resources of Texas. For the 100-year anniversary of TFS, the agency presents a new edition of this classic book, telling the stories of 101 trees throughout the state. Some are old friends, featured in the first edition and still alive (27 of the original 81 trees described in the first edition have died); some are newly designated, discovered as people began to recognize their age and value. All of them remain "living links" to the state's storied past.

A collection of 18 articles inspired by the Meristem 2007 Forum, "Restorative Commons for Community Health." The articles include interviews, case studies, thought pieces, and interdisciplinary theoretical works that explore the relationship between human health and the urban environment. This volume is a joint endeavor of Meristem and the U.S. Forest Service Northern Research Station as they work to strengthen networks of researchers and practitioners to develop new solutions to persistent and emergent challenges to human health, well-being, and potential within the urban environment.

In the past 30 years, the field of librarianship has increasingly recognized the importance of targeted programs for leadership development. The first of these were designed and offered by the Association of Research Libraries and evolved from their Management Skills Institutes. This book describes 18 programs that have been created to fulfill not only a need but also a growing demand for formal education and training programs. The chapters in this book discuss within a common framework the major programs that already exist. It also accomplishes another more important purpose: It effectively illuminates what needs to be done to ensure we will have the leaders needed for future success and sustainability.

Concise and focused, the Wonders Reading/Writing Workshop is a powerful instructional tool that provides students with systematic support for the close reading of complex text. Introduce the week's concept with video, photograph, interactive graphic organizers, and more Teach through mini lessons that reinforce comprehension strategies and skills, genre, and vocabulary Model elements of close reading with shared, short-text reads of high interest and grade-level rigor
