In *How to Explain Absolutely Anything to Absolutely Anyone: The art and science of teacher explanation*, Andy Tharby talks teachers through a set of remarkably simple techniques that will help revolutionise the precision and clarity of their message. Explanation is an art form, albeit a slightly mysterious one. We know a great explanation when we see or hear one, yet nevertheless we struggle to pin down the intricacies of the craft. Just how exactly is it done? In *How to Explain Absolutely Anything to Absolutely Anyone*, Andy Tharby eloquently explores the art and science of this undervalued skill and illustrates how improving the quality of explanation can improve the quality of learning. Delving into the wonder of metaphor, the brilliance of repetition and the timeless benefits of storytelling, Andy sets out an evidence-informed approach that will enable teachers to explain tricky concepts so well that their students will not only understand them perfectly, but remember them forever too. By bringing together evidence and ideas from a wide range of sources including cognitive science, educational research and the study of linguistics the book examines how the most effective writers and speakers manage to transform even the most messy, complicated idea into a thing of wondrous, crystalline clarity. Then, by provoking greater thought and contemplation around language choices in the classroom, Andy spells out how the practical tools and techniques discussed can be put into practice. Andy also puts the important role of learner autonomy in context, recognising that there is a time for teachers to talk and a time for pupils to lead their own learning and contends that, in most cases, teachers should first lay out the premise before opening the space for interrogation. Ultimately, *How to Explain Absolutely Anything to Absolutely Anyone* argues that good teaching is not about talking more or less, but about talking better. Brimming with sensible advice applicable to a range of settings and subjects, this book is suitable for teachers and educators of learners aged 7 to 16.

The classic first analysis of the art of flying is back, now in a special 50th anniversary limited edition with a foreword by Cliff Robertson. leatherette binding, and gold foil stamp. Langewiesche shows precisely what the pilot does when he or she flies, just how it's done, and why.

A RADICAL AND CONFRONTING EXPLANATION OF THE HUMAN MIND. Observe humans from an outsider's perspective. The age-old art of human hunting is one you must orchestrate with care. In *The Art of Hunting Humans*, you'll learn essential facts about Earth's smartest primate and discover mistakes that are common among hunters while in pursuit of their prey. Whether you are an experienced hunter or a novice, this guide is essential reading. In it, you'll learn the major steps for a hunt -- from correct observation and selection of your prey to choosing the tastiest bait. It will reveal how to leverage humans' self-ignorance and strange behaviours and expose flaws of which they are oblivious. At the end of the book, you will have the opportunity to meet the SUPERIORS -- creatures like no other. You'd better be ready! Even if you're a seasoned hunter, *The Art of Hunting Humans* provides extraordinary insights into human behaviour as well as tips that will blow your mind. Almost everything in this book is a trap. Enjoy!

In this book Raymond Boudon examines the main theories for the explanation of beliefs, providing a major contribution to the analysis of beliefs and the theory of rationality.

A novel defense of abduction, one of the main forms of nondeductive reasoning. With this book, Igor Douven offers the first comprehensive defense of abduction, a form of nondeductive reasoning. Abductive reasoning, which is guided by explanatory considerations, has been under normative pressure since the advent of Bayesian approaches to rationality. Douven argues that, although it deviates from Bayesian tenets, abduction is nonetheless rational. Drawing on scientific results, in particular those from reasoning research, and using computer simulations, Douven addresses the main critiques of abduction. He shows that versions of abduction can perform better than the currently popular Bayesian approaches—and can even do the sort of heavy lifting that philosophers have hoped it would do. Douven examines abduction in detail, comparing it to other modes of inference, explaining its historical roots, discussing various definitions of abduction given in the philosophical literature, and addressing the problem of underdetermination. He looks at reasoning research that investigates how judgments of explanation quality affect people's beliefs and especially their changes of belief. He considers the two main objections to abduction, the dynamic Dutch book argument, and the inaccuracy-minimization argument, and then gives abduction a positive grounding, using agent-based models to show the superiority of abduction in some contexts. Finally, he puts abduction to work in a well-known underdetermination argument, the argument for skepticism regarding the external world.

A Note of Explanation is a previously unknown work by iconic writer Vita Sackville-West. Written in 1922, it was recently rediscovered as a miniature book in Queen Mary's dollhouse in Windsor Castle. Witty and stylish, the story recounts the antics of a time-traveling sprite who inhabits the dollhouse. This illustrated ebook edition presents the story for the first time since 1924. Lovers of literature and history will rejoice in this irresistible one-of-a-kind ebook.

An interdisciplinary study of explanation and the construction of value regarding works of literature and painting.

38 pages, includes: color charts, color diagrams. A continuing discussion of the Long/Short strategy used by hedge funds to curb market losses, the Short/Long strategy adds derivatives and leverage to the mix; also includes an explanation of two risk-free arbitrage strategies. Reading the Long/Short Margin Ratio Hedge strategy first will help with comprehension of the Short/Long strategy's advanced discussion.
