change--mergers, reorganizations, transformations--and why it succeeds or fails. The Change Monster is the first book on the central issue that blows so many change efforts out of the water: the human interactions and emotional dynamics of the people involved. It is also an unusual book about business, one written from the heart as well as the head. The Change Monster is a tough-minded but compassionate book about leadership when major changes are demanded: after a merger, when profits are falling or markets being lost. It is also about the discipline and kindness it takes to get the people who report to and depend on you to confront their fears and move on to a new agenda, strategy, or company. The Change Monster is a reminder, through stories and anecdotes, of the essentials

Transformation And Change of the heart and mind that provide the basis for leadership. It also offers warnings that probably will be heeded only after they have been ignored. How, when you think you have made it clear to people what the new objectives are and how they need to behave differently, you are suffering serious illusions. And how, when you think they are not watching, they are, scrutinizing and often misinterpreting your every move. The Change Monster is also a personal journey. It will take you for a roller-coaster ride and make it clear why you have to muster the courage to take people down to reality before you can lead them back up to success, no matter how brilliant the strategy or plan. Jeanie Duck has a voice and style unlike those of any other business book. She introduces her own life into the book

Transformation And Change, humor. The Change Monster has an important tool, the Change Curve, at its core. Developed from Jeanie Duck ' s years of experience working with some of the most important change efforts of our time, it provides a highly practical way to help you understand and deal with “ the change monster ” --the emotions and fears everyone has when going through major change. It will serve as your compass in making judgments about where, both intellectually and emotionally, your people are in their readiness and ability to execute a new strategy or make a new organization succeed. So valuable is it that a General Electric vice president commented after seeing its five stages: “ I feel like someone who ' s been suffering for years with an

end found a book, which turned out to be the source, from which it is possible to obtain absolutely any kind of information about absolutely any person. Meaning, information to the smallest particulars and details about what his or her qualities of personality are, how he or she lives, what he or she really wants to achieve, what he or she hides, and much more. And, it does not matter, if the subject is some person, who lived in the distant past or lives in the present or someone, who will live in the future. Since, as it turned out later on, this literary monument is nothing other than the Catalog of human population. In other words, the encyclopedia of Homo sapiens; in essence, the same as encyclopedias, reference books for specialists, which contain complete information about representatives of a

particular subspecies of animals, plants, etc. Although at some point, the course of this story turned banal: "bad guys" from security services, intelligence services, politics decided to not only use this source of knowledge for their dirty deeds, but also to appropriate it solely for their personal use. And, the way they tried to do this is also banal: by physically destroying the author of discovery of the Catalog of human population and all of his colleagues. However, the ending of this story makes it stand out from the category of ordinary spy stories. At least because the main characters of this story managed to survive not due to favorable concatenation of circumstances or someone ' s help, but thanks to that knowledge, which they discovered in the ancient text, which turned out to be the Catalog of human

Of course, such an outcome upset and continues to upset not only the Russian special services, but also all those people in whose way developers of the Catalog of human population got. And, in this civilization, there are countless numbers of such people: from psychologists (who become no longer needed by anyone) to organizers of this civilization themselves. Since from the standpoint of the Catalog of human population—technogenic civilization without a human, which they lovingly built for many centuries, is simply trash, to put it mildly, and beneath all criticism. And, they themselves are also trash. However, regular people, who (thanks to the scientific discovery made by Andrey Davydov) got the source with answers to all of their questions and

Individual recipes, now no longer need to pay "experts on the human soul" for being shamelessly fooled. Therefore, whoever tries to kill developers of the Catalog of human population in the future must know that it is no longer possible, as they already became part of history of humanity. After all, at the current stage of development, a Homo sapiens has only one possibility to continue to live after death, to live through the ages: in the product that he/she created. And, those, who tried and continue to try to kill them, were nobodies and will remain nobodies, who one day will cease to exist without leaving a trace. As for organizers of this "civilization"—maybe instead of trying to find new recipes to destroy "excess billions" and trying to examine human potential using Neanderthal methods, it

would be more reasonable not only to find out the recipe of how to make Homo sapiens a 100% controllable producer and consumer from the source (which, by the way, seems to have been left to humanity by creators of nature and a human on this planet), but also how to build a civilization without quotes? After all, it only seems to them that they are the main deceivers, while in reality they were fooled, and fooled majorly.
