The Crimean War (1854-56) was fought by an alliance of Britain, France, Turkey and Sardinia against Russia. It was the only major European conflict the Army engaged in between 1816 and 1914. For the British, the campaign was symbolised by military and logistical incompetence alongside the bravery and endurance of its soldiers.

## Crimean War - HISTORY

During the Crimean War (1853–1856), a naval campaign was fought in the Sea of Azov between the Royal Navy and the French Navy against the Russian Navy between 25 May–22 November 1855. British and French warships struck at every vestige of Russian power along the coast of the Sea of Azov. Except for Rostov and Azov, no town, depot, building or fortification was immune from attack and Russian naval power ceased to exist almost overnight.

The Crimean War was a military conflict fought from October 1853 to February 1856 in which Russia lost to an alliance made up of the Ottoman Empire, the United Kingdom, Sardinia and France. The immediate cause of the war involved the rights of Christian minorities in the Holy Land, then a part of the Ottoman Empire. The French promoted the rights of Roman Catholics, while Russia promoted those ...

The siege of Sevastopol lasted from October 1854 until September 1855, during the Crimean War. The allies landed at Eupatoria on 14 September 1854, intending to make a triumphal march to Sevastopol, the capital of the Crimea, with 50,000 men. The 56-kilometre traverse took a year of fighting against the Russians. Major battles along the way were Alma, Balaklava, Inkerman, Tchernaya, Redan, and, finally, Malakoff. During the siege, the allied navy undertook six bombardments of the capital, on 17

Too often historical writing on the Russian War of 1854-56 focuses narrowly on the land campaign fought in the Crimean peninsula in the Black Sea. The wider war waged at sea by the British and French navies against the Russians is ignored. The allied navies aimed to strike at Russian interests anywhere in the world where naval force could be brought to bear, and as a result campaigns were waged in the Baltic, the Black Sea, the White Sea, on the Russian Pacific coast and in the Sea of Azoff. Yet it is the land campaign in the Crimea that shapes our understanding of events. In this graphic and original study, Peter Duckers seeks to set the record straight. He shows how these neglected naval campaigns were remarkably successful, in contrast to the wretched failures that beset

the British army on land. Allied warships ranged across Russian waters sinking shipping, disrupting trade, raiding ports, bombarding fortresses, destroying vast quantities of stores and shelling coastal towns. The scale and intensity of the naval operations embarked upon during the war are astonishing, and little appreciated, and this new book offers the first overall survey of them.

In contrast to every other book about the conflict Andrew Lambert's ground-breaking study *The Crimean War: British Grand Strategy against Russia, 1853-1856* is neither an operational history of the armies in the Crimea, nor a study of the diplomacy of the conflict. The core concern is with grand strategy, the development and implementation of national policy and strategy. The key concepts are strategic, derived from the works of Carl von Clausewitz and Sir Julian Corbett, and the main focus is on naval, not military operations. This original approach rejected the 'Continentalist' orthodoxy that dominated contemporary writing about the history of war, reflecting an era when British security policy was dominated by Inner German Frontier, the British Army of the Rhine and Air Force Germany. Originally published in 1990 the book appeared just as the Cold War ended; the strategic landscape for Britain began shifting away from the continent, and new commitments were emerging that heralded a return to maritime strategy, as adumbrated in the defence policy papers of the 1990s. With a new introduction that contextualises the 1990 text and situates it in the developing historiography of the Crimean War the new edition makes this essential book available to a new generation of scholars.

Our fascination with the drama of war at sea is as strong today as it was in the heyday of the sailing ship. This book, written by one of the world's foremost authors on naval warfare, describes the dramatic battles of an age when sail was supreme. Andrew

Lambert's comprehensive history examines key naval conflicts from the highest strategic level right down to the experience of the ordinary sailor. Fully illustrated throughout, this book incorporates computer-generated cartography that brings the sea battles to life. An in-depth look at ship design and the "floating culture" onboard The Anglo-Dutch Wars of 1650–74, when English commanders challenged Dutch sea power with superior speed, close quarters fighting, and fireships The rise and fall of the French Navy under the Sun King, Louis XIV The Napoleonic Wars, the defeat of the French fleet, and the rise of British Royal Navy hero Admiral Lord Horatio Nelson

Winfried Baumgart's masterful history of the Crimean War has been expanded and fully updated to reflect advances made in the field since the book's first publication. It convincingly argues that if the war had continued after 1856, the First World War would have taken place 60 years earlier, but that fighting ultimately ceased because diplomacy never lost its control over the use of war as an instrument in power politics. With 19 images, 13 maps and additional tables as well as a brand new chapters on 'the medical services', this expanded and fully-updated 2nd edition explores \*

- The origins and diplomacy of the Crimean War
- The war aims and general attitudes of the belligerent powers (Russia, France, and Britain), non-belligerent German powers (Austria and Prussia) and a selected number of neutral powers, including the United States
- The characteristics and capabilities of the armies involved
- The nature of the fighting itself

The Crimean War: 1853-1856 examines the conflict in both its Europe-wide and global contexts, moving beyond the five great European powers to consider the role and importance of smaller states and theatres of war that have otherwise been under-served. To this end, it looks at fighting on the Danube front, the Black Sea, the Baltic Sea, the Caucasian battlefield, as well as the White Sea and the Pacific, with final chapters devoted to the Paris peace congress of 1856, the end of the war and its legacy.

This book remains the definitive study of one of the most important wars in modern history.

Crimea: The Great Crimean War, 1854-1856 by Trevor Royle The Crimean War is one of history's most compelling subjects. It encompassed human suffering, woeful leadership and maladministration on a grand scale. It created a heroic myth out of the disastrous Charge of the Light Brigade and, in Florence Nightingale, it produced one of history's great heroes. New weapons were introduced; trench combat became a fact of daily warfare outside Sebastopol; medical innovation saved countless soldiers' lives that would otherwise have been lost. The war paved the way for the greater conflagration which broke out in 1914 and greatly prefigured the current situation in Eastern Europe.

The Crimean War is full of resonance - not least, the Charge of the Light Brigade, the Siege of Sevastopol and Florence Nightingale at Scutari with her lamp. In this fascinating book, Clive Ponting separates the myths from the reality, and tells the true story of the heroism of the ordinary soldiers, often through eye-witness accounts of the men who fought and those who survived the terrible winter of 1854-55. To contemporaries, it was 'The Great War with Russia' - fought not only in the Black Sea and the Crimea but in the Baltic, the Arctic, the Pacific and the Caucasus. Ironically, Britain's allies were France, her traditional enemy, ably commanded (from home) by Napoleon III himself, and the Muslim Ottoman Empire, widely seen as an infidel corrupt power. It was the first of the 'modern' wars, using rifles, artillery, trench systems, steam battleships, telegraph and railways; yet the British soldiers wore their old highly coloured uniforms and took part in their last cavalry charge in Europe. There were over 650,000 casualties. Britain was unable fully to deploy her greatest strength, her Navy, while her Army was led by incompetent aristocrats. The views of ordinary soldiers about Raglan, Cardigan and Lucan make painful reading.

This remarkable work features the Crimean War as depicted by the late Victorian military writer James Grant. The material here was first published in 1894, only 40 years after the end of the Crimean War, at a time when many of the participants were still in their sixties. Grant therefore had access to the primary source interviews which are now lost forever. Originally published as part of the Cassell's series 'British Battles on Land and Sea', it presents the reader with an intriguing insight into how contemporary writers addressed their subject. They say the past is another country and that is certainly true in this instance. The contrast between the contemporary Victorian view and the modern view reveals the huge gulf in attitudes. Mr. Grant's work is clearly 'of its time' and reflects the attitudes of the day which were unashamedly xenophobic, jingoistic and militaristic. It nonetheless repays the reader as it provides us with a unique window on the past and brings the long lost world of Victorian Imperialism into focus.

The Crimean War was fought far from its namesake peninsula in Ukraine. Until now, accounts of Britain's and France's naval campaigns against Czarist Russia in the Baltic, White Sea, and Pacific have remained fragmented, minimized, or thinly-referenced. This book considers each campaign from an imperial perspective extending from South America to Finland. Ultimately, this regionally-focused approach reveals that even the smallest Anglo-French naval campaigns in the remote White Sea had significant consequences in fields ranging from medical advances to international maritime law. Considering the perspectives of neutral powers including China, Japan, and Sweden-Norway, allows Rath to examine the Crimean conflict's impact on major historical events ranging from the 'opening' of Tokugawa Japan to Russia's annexation of large swaths of Chinese territory. Complete with customized maps and an extensive reference section, this will become essential reading for a varied audience.
