One day, two thieves arrived in town pretending to be weavers who knew how to make the most beautiful and sophisticated fabrics, which had the marvellous property of only being visible to those who did their job well.. It was the perfect offer for our king, who immediately placed an order. Hans Christian Andersen (1805-1875) was a Danish author, poet and artist. The Emperor Has No Clothes: Teaching About Race and Racism to People Who Don't Want to Know offers theoretical grounding and practical approaches for leaders and teachers interested in effectively addressing racism and other oppressive constructs. The book draws both on the author's extensive experience teaching about race and racism in classroom and community settings and from the theory and practice of a wide range of educators, activists, and researchers committed to social justice. The first chapter looks at the toxic consequences of our western cultural insistence on profit, binary thinking, and individualism to establish the theoretical framework for teaching about race and racism. Chapter two investigates privileged resistance, offering a psycho/social history of denial, particularly as a product of racist culture. Chapter three reviews the research on the construction and reconstruction of dominant culture both historically and now in order to establish sound strategic approaches that educators, teachers, facilitators, and activists can take as we work together to move from a culture of profit and fear to one of shared hope and love. Chapter four lays out the stages of a process that supports teaching about racist, white supremacy culture, explaining how students can be taken through an iterative process of relationshipbuilding, analysis, planning, action, and reflection. The final chapter borrows from the brilliant, brave, and incisive writer Dorothy Allison to discuss the things the author knows for sure about how to teach people to see that which we have been conditioned to fear knowing. The chapter concludes with how to encourage and support collective and collaborative action as a critical goal of the process.

Speaks out in clear and provoking terms what many of us have sensed but have often been unable to articulate. These commentaries are the result of over 15 years of addressing the issues of our day in his monthly commentary "The Bottom Line." Broad in scope and specific in application, readers will find this book to be more than a critique of our current culture.

A naturopathic doctor delivers a critique of conventional medical practice.

"Joyce Roché rose from humble circumstances to earn an Ivy League MBA and eventually become the first African-American vice president of Avon. She was later president of a leading hair care company and CEO of the nationally prominent nonprofit Girls Inc. But she never felt she deserved her success. In fact, the phrase "the empress has no clothes" kept running through her head. She was nothing like the emperor in the Hans Christian Andersen story -- she was certainly not a fraud. And yet that's how she'd always felt. Roché discovered there was a name for this: the impostor syndrome. In this deeply personal memoir she shares her lifelong struggle with the imposter syndrome and offers advice and coping strategies based on her own experiences and those of other high-achieving leaders who have suffered from it."--Publisher website.

From "Reefer Madness" to legal purchase at the corner store With long-time legal and social barriers to marijuana falling across much of the United States, the time has come for an accessible and informative look at attitudes toward the dried byproduct of Cannabis sativa. Marijuana: A Short History profiles the politics and policies concerning the five-leaf plant in the United States and around the world. Millions of Americans have used marijuana at some point in their lives, yet it remains a substance shrouded by myth, misinformation, and mystery. And nearly a century of prohibition has created an enforcement system that is racist, and the continuing effects of racially-targeted over criminalization limit economic and social opportunities in communities of color. Marijuana: A Short History tells this story, and that of states stepping up to enact change. This book offers an up-to-date, cutting-edge look at how a plant with a tumultuous history has emerged from the shadows of counterculture and illegality. Today, marijuana has become a remarkable social, economic, and even political force—with a surprising range of advocates and opponents. Over the past two decades marijuana policy has transformed dramatically in the United States, as dozens of states have openly defied the federal government. Marijuana: A Short History provides a brief yet compelling narrative that discusses the social and cultural history of marijuana but also tells us how a once-vilified plant has been transformed into a serious, even mainstream, public policy issue. Focusing on politics, the media, government, racism, criminal justice, and education, the book describes why public policy has changed, and what that change might mean for marijuana's future place in society.
