Estrogen is most likely to affect your weight as you age due to the fact that estrogen actually decreases. A number of variables such as the loss of muscle mass, the increase of visceral fat (the fat surrounding internal organs) and a decrease in physical activity, which is common in older age all contribute to weight gain and estrogen has a role to play in this.

Replacement Therapy levels decline and its protective qualities decline as well. At the same time, a lifetime of bad habits may begin to catch up with us, and our genetic predispositions to disease begin to surface. All this leads to a plethora of symptoms, some temporary, some chronic and some life-threatening. The Menopause Answer Book allows women to carefully assess their own symptoms and then seek out the information and treatments that will be tailored to their own specific needs: -- Find out if you're at risk for diseases associated with menopause -- Develop your Menopause Action Plan -- Assess the pros and cons of Hormone Replacement Therapy -- Find out what tests to request from your doctor -- Find out how to get the

From reviews of the previous edition: ‘ Provides a wealth of information ... graphically illustrates the need for practitioners to be thoroughly knowledgeable. ’ Toni Belfield, Director of Information, Family Planning Association. The world ’ s population is increasing dramatically. At levels over 7 billion, rising annually by over 83 million (with births outstripping deaths by a factor of c. 2.4) the toll this imbalance takes on the environment, developing economies and resources (healthcare, education, rates of poverty) and the lives of women in the poorer parts of the world is increasingly unsustainable. Even in the developed world there is still an unacceptably high rate of unplanned pregnancies, demonstrating that appropriate education
