## ~~Chapter 5 collection and the collection disciplines~~

While some intelligence is indeed collected through clandestine operations and known only at the highest levels of government, other intelligence consists of information that is widely available. There are five main ways of collecting intelligence that are often collectively referred to as intelligence collection disciplines, or INTs.

technical terms, the definition, history, process, management, and future trends of each intelligence collection source (INT). Authoritative and non-polemical, this book is the perfect teaching tool for classes addressing various types of collection. Chapter authors are past or current senior practitioners of the INT they discuss, providing expert assessment of ways particular types of collection fit within the larger context of the U.S. Intelligence Community. This volume shows all-source analysts a full picture of how to better task and collaborate with their collection partners, and gives intelligence collectors an appreciation of what happens beyond their "stovepipes," as well as a clear assessment of the capabilities and limitations of INT collection.

Intelligence Collection by Robert M. Clark—one of the foremost authorities in the field—offers systematic and analytic coverage of the “ how and why ” of intelligence collection across its three major stages: the front end (planning), collection, and the back end (processing, exploitation, and dissemination). The book provides a fresh, logical, and easily understandable view of complex collection systems used worldwide. Its ground-breaking organizational approach facilitates understanding and cross-INT collaboration, highlighting the similarities and differences among the collection INTs. Part one explains how the literal INTs such as communications intelligence and cyber collection work. Part two focuses on nonliteral INTs including imagery, electronic intelligence, and MASINT.

All chapters use a common format based on systems analysis methodology, detailing function, process, and structure of the collection disciplines. Examples throughout the book highlight topics as diverse as battlespace situational awareness, terrorism, weapons proliferation, criminal networks, treaty monitoring, and identity intelligence.

Diversity initiatives are falling short. This book shows leaders how to develop the skills needed to build sustainably inclusive organizations using a tested, research-based model developed by the global organizational consulting firm Korn Ferry. According to the journal Human Resource Management, companies are spending over \$8

billion a year on diversity programs. Yet today, the senior leadership teams at Fortune 500 companies are far from mirroring the diversity of its workforce and its customers. Andrés Tapia and Alina Polonskaia, senior leaders at Korn Ferry, argue that to build sustainable diversity and inclusion, organizations need to have inclusive leaders at all levels. In this book, Tapia and Polonskaia draw on Korn Ferry's massive database of 3 million leadership assessments to reveal the essential qualities of inclusive leaders. They discuss the personality traits these leaders share and detail how to develop what they call the five disciplines of inclusive leadership: building interpersonal trust, integrating diverse perspectives, optimizing talent, applying an adaptive mindset, and achieving transformation. Tapia

and Polonskaia also outline the competencies behind each discipline, describe individual and organizational exemplars of inclusive leadership, and show how the five disciplines enable leaders to unleash the power of all people and to build both structurally and behaviorally inclusive organizations. This book will help leaders foster the skills to deal with today's complex challenges and create a more inclusive, sustainable, and prosperous future for all of us.

Nothing is more important to business success than innovation . . . And here ' s what you can do about it on Monday morning with the definitive how-to book from the world ' s leading authority on innovation When it comes to innovation, Curt Carlson and Bill Wilmot of SRI International

know what they are talking about—literally. SRI has pioneered innovations that day in and day out are part of the fabric of your life, such as:

- The computer mouse and the personal computer interface you use at home and work
- The high-definition television in your living room
- The unusual numbers at the bottom of your checks that enable your bank to maintain your account balance correctly
- The speech-recognition system used by your financial services firm when you call for your account balance or to make a transaction.

Each of these innovations—and literally hundreds of others—created new value for customers. And that ' s the central message of this book. Innovation is not about inventing clever gadgets or just “ creativity. ” It is the successful creation and delivery of a new or improved

product or service that provides value for your customer and sustained profit for your organization. The first black-and-white television, for example, was just an interesting, cool invention until David Sarnoff created an innovation—a network—that delivered programming to an audience. The genius of this book is that it provides the “ how ” of innovation. It makes innovation practical by getting two groups who are often disconnected—the managers who make decisions and the people on the front lines who create the innovations—onto the same page. Instead of smart people grouching about the executive suite not recognizing a good idea if they tripped over it and the folks on the top floor wondering whether the people doing the complaining have an understanding of market realities, Carlson and

Wilmot ' s five disciplines of innovation focus attention where it should be: on the creation of valuable new products and services that meet customer needs. Innovation is not just for the “ lone genius in the garage ” but for you and everyone in your enterprise. Carlson and Wilmot provide a systematic way to make innovation practical, one intimately tied to the way things get done in your business. Teamwork isn't enough. Creativity isn't enough. A new product idea isn't enough. True innovation is about delivering value to customers. Innovation reveals the value-creating processes used by SRI International, the organization behind the computer mouse, robotic surgery, and domain names. Curt Carlson and Bill Wilmot show you how to use these practical, tested processes to create great

MORE THAN ONE MILLION COPIES IN PRINT • “ One of the seminal management books of the past seventy-five years. ” —Harvard Business Review This revised edition of the bestselling classic is based on fifteen years of experience in putting Peter Senge ’ s ideas into practice. As Senge makes clear, in the long run the only sustainable competitive advantage is your organization ’ s ability to learn faster than the competition. The leadership stories demonstrate the many ways that the core ideas of the Fifth Discipline, many of which seemed radical when first published, have become deeply integrated into people ’ s ways of seeing the world and their managerial practices.

Senge describes how companies can rid themselves of the learning blocks that threaten their productivity and success by adopting the strategies of learning organizations, in which new and expansive patterns of thinking are nurtured, collective aspiration is set free, and people are continually learning how to create the results they truly desire.

Mastering the disciplines Senge outlines in the book will:

- Reignite the spark of genuine learning driven by people focused on what truly matters to them
- Bridge teamwork into macrocreativity
- Free you of confining assumptions and mindsets
- Teach you to see the forest and the trees
- End the struggle between work and personal time

This updated edition contains more than one hundred pages of new material based on interviews with dozens of

the what but also how effective execution is achieved. They share numerous examples of companies that have done just that, not once, but over and over again. This is a book that every leader should read! (Clayton Christensen, Professor, Harvard Business School, and author of "The Innovator s Dilemma)." Do you remember the last major initiative you watched die in your organization? Did it go down with a loud crash? Or was it slowly and quietly suffocated by other competing priorities? By the time it finally disappeared, it s likely no one even noticed. What happened? The whirlwind of urgent activity required to keep things running day-to-day devoured all the time and energy you needed to invest in executing your strategy for tomorrow. "The 4 Disciplines of Execution" can change all that forever.
