National drug chains squeeze local pharmacies out of business, while corporate downsizing ships jobs overseas. All across America, communities large and small are losing control of their economies to outside interests. Going Local shows how some cities and towns are fighting

## Read Book The From The Local

back. Refusing to be overcome by Wal-Marts and layoffs, they are taking over abandoned factories, switching to local produce and manufactured goods, and pushing banks to loan money to local citizens. Shuman details how dozens of communities are recapturing their own economies with these new

## Read Book The From The Local

strategies, investing not in outsiders but in locally owned businesses.

"A history of the deep social and economic changes of France, told through the story of a single extended family, from the mid-eighteenth through the early twentieth century"--

# Read Book The From The Local

The goal of this book is to present local class field theory from the cohomological point of view, following the method inaugurated by Hochschild and developed by Artin-Tate. This theory is about extensions-primarily abelian-of "local" (i.e., complete for a

# Read Book The From The Local

discrete valuation) fields with finite residue field. For example, such fields are obtained by completing an algebraic number field; that is one of the aspects of "localisation". The chapters are grouped in "parts". There are three preliminary parts: the first two on the general theory of local

# Read Book The From The Local

fields, the third on group cohomology. Local class field theory, strictly speaking, does not appear until the fourth part. Here is a more precise outline of the contents of these four parts: The first contains basic definitions and results on discrete valuation rings, Dedekind domains

# Read Book The From The Local

(which are their "globalisation") and the completion process. The prerequisite for this part is a knowledge of elementary notions of algebra and topology, which may be found for instance in Bourbaki. The second part is concerned with ramification phenomena (different,

## Read Book The From The Local

discriminant, ramification groups, Artin representation). Just as in the first part, no assumptions are made here about the residue fields. It is in this setting that the "norm" map is studied; I have expressed the results in terms of "additive polynomials" and of "multiplicative polynomials", since

Lasagna to Black and Blue Bison Stew--will inspire home cooks not only to make better use of the foods all around them but also to honor the storied heritage they represent.

## Read Book The From The Local

How to analyze data settings rather than data sets, acknowledging the meaning-making power of the local. In our data-driven society, it is too easy to assume the transparency of data. Instead, Yanni Loukissas argues in *All Data Are Local*, we should approach data sets with an awareness that data

## Read Book The From The Local

are created by humans and their dutiful machines, at a time, in a place, with the instruments at hand, for audiences that are conditioned to receive them. The term data set implies something discrete, complete, and portable, but it is none of those things. Examining a series of data

## Read Book The From The Local

sources important for understanding the state of public life in the United States—Harvard's Arnold Arboretum, the Digital Public Library of America, UCLA's Television News Archive, and the real estate marketplace Zillow—Loukissas shows us how to analyze data settings rather than data

## Read Book The From The Local

sets. Loukissas sets out six principles: all data are local; data have complex attachments to place; data are collected from heterogeneous sources; data and algorithms are inextricably entangled; interfaces recontextualize data; and data are indexes to local knowledge. He then provides a set of

## Read Book The From The Local

practical guidelines to follow. To make his argument, Loukissas employs a combination of qualitative research on data cultures and exploratory data visualizations. Rebutting the “myth of digital universalism,” Loukissas reminds us of the meaning-making power of the local.

# Read Book The From The Local

This brilliantly original book dismantles the underlying assumptions that drive the decisions made by companies and governments throughout the world, to show that our shared narrative of the global economy is deeply flawed. If left unexamined, they will lead

# Read Book The From The Local

corporations and countries astray, with dire consequences for us all. For the past fifty years or so, the global economy has been run on three big assumptions: that globalization will continue to spread, that trade is the engine of growth and development, and that economic power is moving

# Read Book The From The Local

from the West to the East. More recently, it has also been taken as a given that our interconnectedness--both physical and digital--will increase without limit. But what if all these ideas are wrong? What if everything is about to change? What if it has already begun to change

## Read Book The From The Local

but we just haven't noticed? Increased automation, the advent of additive manufacturing (3D printing, for example), and changes in shipping and environmental pressures, among other factors, are coming together to create a fast-changing global economic landscape in which the rules

# Read Book The From The Local

are being rewritten--at once a challenge and an opportunity for companies and countries alike.
