According to legend, Ancient  
Rome was founded by the two  
brothers, and demigods, Romulus  
and Remus, on 21 April 753  
BCE. The legend claims that in an  
argument over who would rule  
the city (or, in another version,  
where the city would be located)  
Romulus killed Remus and named  
the city after himself. This story  
of the founding of Rome is the  
best known but it is not the only  
one.

Long before Alexandria was a city and even before Memphis and Babylon had attained greatness, the ancient Mesopotamian city of Ur stood foremost among ancient Near Eastern cities. Today, the greatness and cultural influence of Ur has been largely forgotten by most people, partially because its monuments have not stood the test of time the way other ancient culture's monuments have. For instance, the

monuments of Egypt were made of stone while those of Ur and most other Mesopotamian cities were made of mud brick and as will be discussed in this report, mud-brick may be an easier material to work with than stone but it also decays much quicker. The same is true to a certain extent for the written documents that were produced at Ur. No site better represents the importance of the Sumerians than the city of Uruk. Between the fourth and the third millennium BCE, Uruk was one of several city-states in the land of Sumer, located in the southern end of the Fertile Crescent, between the two great rivers of the Tigris and the Euphrates. Discovered in the late 19th century by the British

archaeologist William Loftus, it is this site that has revealed much of what is now known of the Sumerian, Akkadian, and Neo-Sumerian people. Hattusa was different from the other major cities of the ancient Near East in one major respect: it was landlocked and not located on a major river. At first glance, such a situation may seem like a liability, which it was in terms of trade, but for the most part its central position meant that the Hittites could move their armies more efficiently from one theater of operations to another (Macqueen 2003, 56). As a landlocked capital, Hattusa was also safe from naval attacks from other kingdoms, so if the Hittites' enemies wanted to invade their

capital, they would have to trek through the middle of the kingdom to get there, which was most unlikely. As Hittite power grew during the Old Kingdom, the royal city of Hattusa became more important and even wealthier. From his citadel overlooking Hattusa, Hattusili I launched the first major Hittite attacks into the Near East, first conquering the cities between Hattusa and the Mediterranean (Macqueen 2003, 36). Although the Biblical accounts of the Assyrians are among the most interesting and are often corroborated with other historical sources, the Assyrians were much more than just the enemies of the Israelites and brutal thugs. Among all the cities that thrived

In the ancient Near East, few can match the opulence and ostentatiousness of Nineveh, the capital of the Assyrian Empire for much of the seventh century BCE. During that time it became known for its mighty citadels, grand palaces, beautiful gardens, and even its zoos. In fact, the beauty of Nineveh, especially its gardens, impressed later writers so much that they assigned its gardens as one of the original Seven Wonders of the World, except unfortunately for Nineveh's memory, the location was placed in Babylon. The confusion that assigned one of the Wonders of the World to Babylon instead of Nineveh is in fact a large part of Nineveh's history - it was a great city during its time, but incessant

Mesopotamia The metropolis to oblivion and eventually its history was forgotten or distorted. Today, Babylon has become a byword for greed, excess, and licentiousness, mostly due to its mention in the Bible, but a closer examination reveals that Babylon was so much more, and even perhaps the most important city in the ancient world. Ancient Babylon was home to great dynasties that produced some of the world's most influential leaders, most notably Hammurabi and Nebuchadnezzar.

The human race is on a 10,000 year urban adventure. Our ancestors wandered the planet or lived scattered in villages, yet by the end of this century almost all of us will live in cities. But that journey has not been a smooth one and urban civilizations have risen and fallen many times in history. The ruins of many of them still enchant us. This book tells the story of the rise and fall of ancient cities from the end of the Bronze Age to the beginning of the Middle Ages. It is a tale of

War and politics, pestilence and famine, triumph and tragedy, by turns both fabulous and squalid. Its focus is on the ancient Mediterranean: Greeks and Romans at the centre, but Phoenicians and Etruscans, Persians, Gauls, and Egyptians all play a part. The story begins with the Greek discovery of much more ancient urban civilizations in Egypt and the Near East, and charts the gradual spread of urbanism to the Atlantic and then the North Sea in the centuries that followed. The ancient Mediterranean, where our story begins, was a harsh environment for urbanism. So how were cities first created, and then sustained for so long, in these apparently unpromising surroundings? How

did they feed themselves, where

Why, in the end, did their rulers  
give up on them? And what it was  
like to inhabit urban worlds so  
unlike our own - cities plunged  
into darkness every night, cities  
dominated by the temples of the

slaves, cities of soldiers.

Ultimately, the chief characters in  
the story are the cities  
themselves. Athens and Sparta,

Four Lost Cities. The acclaimed science journalist Annalee Newitz takes readers on an entertaining and mind-bending adventure into the deep history of urban life.

Investigating across the centuries and around the world, Newitz explores the rise and fall of four ancient cities, each the center of a sophisticated civilization: the Neolithic site of Çatalhöyük in Central Turkey, the Roman vacation town of Pompeii on Italy's southern coast, the medieval megacity of Angkor in Cambodia, and the indigenous metropolis Cahokia, which stood beside the Mississippi River where East St. Louis is today. Newitz travels to all four sites and investigates the cutting-edge research in archaeology,

revealing the mix of environmental changes and political turmoil that doomed these ancient settlements.

Tracing the early development of urban planning, Newitz also introduces us to the often anonymous workers—slaves, women, immigrants, and manual laborers—who built these cities and created monuments that lasted millennia. *Four Lost Cities* is a journey into the forgotten past, but, foreseeing a future in which the majority of people on Earth will be living in cities, it may also reveal something of our own fate.

facet of urban life in ancient Egypt with a leading authority in the field as a guide Ancient Egyptian cities and towns have until recently been one of the least-studied and least-published aspects of this great ancient civilization. Now, new research and excavation are transforming our knowledge. This is the first book to bring these latest discoveries to a wide audience and to provide a comprehensive overview of what we know about ancient settlement during the dynastic period. The cities range in date from early urban centers to large metropolises. From houses to palaces to temples, the different parts of Egyptian cities and towns are examined in detail, giving a clear picture of the urban
