The authors invited more than 100 journalists worldwide to use photographs, charts and essays to explore the world of big data and its growing influence on our lives and society.

This hilarious, highly original series, which so astutely captures the odd preoccupations of middle schoolers, will appeal to the many fans of the Origami Yoda series and such gross-out classics as How to Eat Fried Worms and Freckle Juice. Lyle Hertzog and his friends Marilla and Dave are the Qwikpick Adventure Society, three kids who seek out adventure in their seemingly quiet hometown of Crickenburg. On the hunt for their next big mission—something to top the Fountain of Poop, if that’s even possible—the kids overhear a construction worker telling his buddies about a rat with a human face he saw in the basement of an old research facility. The decision is unanimous: the next adventure for the Qwikpick Society is on! But when their trip to find the rat doesn’t go quite as expected, the trio gets into big trouble. Will the second adventure for the Qwikpick Society also be their last?

The past few decades have seen an explosion of research on causal reasoning in philosophy, computer science, and statistics, as well as descriptive work in psychology. In Causation with a Human Face, James Woodward integrates these lines of research and argues for an understanding of how each can inform the other: normative ideas can suggest interesting experiments, while descriptive results can suggest important normative concepts. Woodward’s overall framework builds on the interventionist treatment of causation that he developed in Making Things Happen. Normative ideas discussed include proposals about the role of invariant or stable relationships in successful causal reasoning and the notion of proportionality. He argues that these normative ideas are reflected in the causal judgments that people actually make as a descriptive matter. Woodward also discusses the common philosophical practice-particularly salient in philosophical accounts of causation—of appealing to intuitions or judgments about cases in support of philosophical theses. He explores how, properly understood, such appeals are not different in principle from appeals to results from empirical research, and demonstrates how they may serve as a useful source of information about causal cognition.

This volume collects essays from academics and practitioners from a diversity of areas and perspectives in order to discuss water security at various levels and to illuminate the central idea of water security: its focus on the individual. Beginning with the big picture, this book aims to illustrate the depth of the water security crisis and its interconnections with other aspects of societal development. It particularly draws a connection to the 2030 Agenda for Sustainable Development, and discusses that challenges faced in meeting the 17 sustainability development goals (SDG) by the year 2030. Moving from international to domestic and community perspectives, this book provides a unique analysis of issues and solutions to the water issues we face today in light of the ever looming global changes brought on by climate change. Over the past few decades the recognition of our common need for water has increased, as policymakers have sought to place more focus on the individual within policy. After the recognition of water and sanitation as a fundamental human right by the United Nations General Assembly in 2010, there is increasing recognition of the individual as the building block for the struggle for water security. This reality also intersects with adverse impacts of global climate change, and the book responds to the broader question: will clean and safe water be available where we need it and when we need it in the future?

Thomas Piketty’s Capital in the Twenty-First Century initiated a great debate not just about inequality but also regarding the failures found in the economic models used by theoreticians and practitioners alike. Wealth of Persons offers a totally different perspective that challenges the very terms of the debate. The Great Recession reveals a great existential rift at the core of certain economic reflections, thereby showing the real crisis of the crisis of economics. In the human sciences we have created a kind of “Tower of Babel” where we cannot understand each other any longer. The “breakdowns” occur equally on the personal, social, political, and economic levels. There is a need for an “about-face” in method to restore harmony among dissociated disciplines. Wealth of Persons offers a key to such a restoration, applying insights and analysis taken from different economic scholars, schools of thought, philosophical traditions, various disciplines, and charismatic entrepreneurs. Wealth of Persons aims at recapturing an adequate understanding of the acting human person in the economic drama, one that measures up to the reality. The investigation is a passport allowing entry into the land of economic knowledge, properly unfolding the anthropological meaning of the free economy.

"Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power.

'TEMPLETON CAN ALWAYS BE RELIED ON TO PROVIDE A WELL-WRITTEN, CLEVERLY PLOTTED WHODUNNIT' THE TIMES Beatrice Lacey is passionate about two things: Human Face, the charity for Third World children she helped to found, and its co-founder, Adam Carnegie. Her devotion to Adam has led her to turn a blind eye to strange goings-on over the years, including the endless merry-go-round of ‘housekeepers’ whose tenure at the charity headquarters is sometimes remarkably short. When the latest housekeeper vanishes in mysterious circumstances, DI Kelso Strang is called to the remote corner of the Isle of Skye to investigate. Keen to move on from recent personal horrors, Strang revels in the responsibility the investigation affords. But with Beatrice unprepared to face the reality of what Human Face has become and vital errors made when his team underestimates the danger, Strang has his work cut out to negotiate the highly complex situation and avoid the case ending in disaster. ‘THE CRIME CZAR OF THE SCOTTISH SMALL TOWN’ VAL MCDERMID

Rural Rides is the book for which the English journalist, agriculturist and political reformer William Cobbett is best known. At the time of writing Rural Rides, in the early 1820s, Cobbett was a radical anti-Corn Law campaigner. He embarked on a series of journeys by horseback through the countryside of Southeast England and the English Midlands. He wrote down what he saw from the points of view both of a farmer and a social reformer. The result documents the early 19th-century countryside and its people as well as giving free vent to Cobbett’s opinions

In this social and cultural history of Czechoslovakia’s “gentle revolution,” James Krapfl shifts the focus away from elites to ordinary citizens who endeavored—from the outbreak of revolution in 1989 to the demise of the Czechoslovak federation in 1992—to establish a new, democratic political culture. Unique in its balanced coverage of developments in both Czech and Slovak lands, including the Hungarian minority of southern Slovakia, this book looks beyond Prague and Bratislava to collective action in small towns, provincial factories, and collective farms. Through his broad and deep analysis of workers’ declarations, student bulletins, newspapers, film footage, and the proceedings of local administrative bodies, Krapfl contends that Czechoslovaks rejected Communism not because it was socialist, but because it was arbitrarily bureaucratic and inhumane. The restoration of a basic “humanness”—in politics and in daily relations among citizens—was the central goal of the revolution. In the strikes and demonstrations that began in the last weeks of 1989, Krapfl argues, citizens forged new symbols and a new symbolic system to reflect the humane, democratic, and nonviolent community they sought to create. Tracing the course of the revolution from early, idealistic euphoria through turns to radicalism and ultimately subversive reaction, Revolution with a Human Face finds in Czechoslovakia’s experiences lessons of both inspiration and caution for people in other countries striving to democratize their governments.

Explores how decision-makers can manage uncertainty that varies in both kind and severity by extending and supplementing Bayesian decision theory.
