Award-winning lecturer Kenneth R. Bartlett applies his decades of experience teaching the Italian Renaissance to this beautifully illustrated overview. In his introductory Note to the Reader, Bartlett first explains why he chose Jacob Burckhardt's classic narrative to guide students through the complex history of the Renaissance and then provides his own contemporary interpretation of that narrative. Over seventy color illustrations, genealogies of important Renaissance families, eight maps, a list of popes, a timeline of events, a bibliography, and an index are included.

There were shadows to the Italian Renaissance. Just as art and philosophy were flourishing, so too were darker practices, from murder-for-hire to prostitution. However, despite popular parallels between families like the Borgia and the Medici and the Mafia, there has been little systematic examination of the presence of organised crime in the era. In this short and lively essay, Mark Galeotti rereads and occasionally reinterprets the rich secondary literature to introduce a cast of corrupt princes, bandit chieftains, professional assassins, human traffickers, thugs and commen and suggest that there were signs of the early beginnings of organised criminality in the towns and cities of late medieval and Renaissance Italy. An historian and political scientist, Mark Galeotti is Professor of Global Affairs at New York University.

Prepared for a course AAP203 (Art and architecture of the Italian Renaissance) offered by the School of Architecture in Deakin University's Open Campus Program.

Ada Palmer explores how Renaissance poets and philologists, not scientists, rescued Lucretius and his atomism theory. This heterodox circulated in the premodern world, not on the conspicuous stage of heresy trials and public debates but in the classrooms, libraries, studies, and bookshops where quiet scholars met transformative ideas.
