This open access book discusses the relationship between periodicals, tourism, and nation-building in Mexico. It enquires into how magazines, a staple form of the promotional apparatus of tourism since its inception, articulated an imaginative geography of Mexico at a time when that industry became a critical means of economic recovery and political stability after the Revolution. Notwithstanding their vogue, popularity, reach, and close affiliations to commerce and state over several decades, magazines have not received any sustained critical attention in the scholarship on that period. This book aims to redress that oversight. It argues that illustrated magazines like Mexican Folkways (1925–1937) and Mexico This Month (1955–1971) offer rich and compelling materials in that regard, not only as unique tools for interrogating the ramifications of tourism on the country's reconstruction, but as autonomous objects of

Over the past decade, there have been an increasing number of publications that have analysed and critiqued the potential of tourism to be a mechanism for poverty reduction in less economically developed countries (LEDCs). This book showcases work by established and emerging researchers that provides new thinking and tests previously made assumptions, providing an essential guide for students, practitioners and academics. This book advances our understanding of the changes and ways forward in the field of sustainable tourism development. Five main themes are illustrated throughout the book: (1) measuring impacts of tourism on poverty; (2) the need to evaluate whether interventions that aim to reduce poverty are effective; (3) how unbalanced power relations and weak governance can undermine efforts; (4) the importance of the private sector's use of pro-poor business practices; and (5) the value of using multidisciplinary and multi-method research approaches. Furthermore, the book shows that academic research findings can be used practically in destinations, and how practitioners can benefit from sharing their experiences with academic scholars. This book was based on a special issue and various articles from the Journal of Sustainable Tourism.

Seasonal variation in demand is a reality for most tourism destinations. This work provides a balanced overview of the evidence and issues relating to tourism seasonality using European, North American and Pacific Rim cases and research evidence.

This volume continues the tradition established by Nash in *The Study of Tourism Anthropological and Sociological Beginnings* (2005) previously published in this series. A significant number of the founding scholars whose work has defined and provided a platform for psychology and marketing studies in tourism contribute their reflective accounts on their initial work. They also locate the initial work they conducted within the milieu in which it was created and link the early work to contemporary concerns both of their own undertaking and more broadly. This is the only publication to collate views on the development of tourism study by all these historically important tourism scholars and provides a unique insight into how the context in which tourism scholars' work influences the studies they undertake. From the renowned Tourism Social Science Series it systematically and cumulatively contributes to the
