proper documents
for bankable
presentations.

It highlights
the need for a
consistent,
systematic
methodology in
performing
evaluation and
feasibility
work. The
objective of a
feasibility and

Read Free The Mining

Valuation study
should be to
assess the value
of the

undeveloped or
developed
mineral property
and to convey
these findings
to the company
that is
considering
applying
technical and

Read Free The Mining

physical changes to bring the property into production of a mineral product. The analysis needs to determine the net present worth returned to the company for investing in these changes and to reach

Read Free The Mining

Valuation
Handbook 3rd
Edition

that decision point as early as possible and with the least amount of money spent on the evaluation study. All resources are not reserves, nor are all minerals an ore. The successful conclusion of

Read Free The Mining

any property
evaluation
depends on the
development,

work, and
conclusions of
the project
team. The

handbook has a
diverse

audience: •

Professionals in
the minerals
industry that

Read Free The Mining

Valuation

perform mineral
property
evaluations. •

Companies that
have mineral
properties and
perform mineral
property
feasibility
studies and
evaluations or
are buying
properties based
on property

Read Free The Mining

Valuation. •

Financial
institutions,
both domestic
and overseas,
that finance or
raise capital
for the minerals
industry. •

Consulting firms
and
architectural
and engineering
contractors that

Read Free The Mining

utilize mineral
property
feasibility
studies and need
standards to
follow. • And
probably the
most important,
the mining and
geological
engineering
students and
geology and
economic geology
