comet-like object roughly 12,000 years ago. The ancient ...

Mysterious patches of glass scattered across the Chilean desert are likely the products of an ancient exploding comet

Heat from a comet exploding just above the ground fused the sandy soil into patches of glass stretching 75 kilometers, a study led by Brown University researchers found. Around 12,000 years ago, comet ...

Ancient Exploding Comet Likely Source of Vast Glassy Rock Patches in Chilean Desert

That's according to a newly published study that called the objects the "first clear evidence" of glass created by a comet – or comets – exploding at a low altitude just above the Earth's surface.

Researchers say they finally know why slabs of glass litter this desert: An ancient, exploding comet

Gravitational waves have hit Earth in record numbers! In all of those 35 waves, some have emerged from merging black holes.

"Delightfully horrifying."--Popular Science This wryly humorous collection of stories about bizarre medical treatments and cases offers a unique portrait of a bygone era in all its jaw-dropping weirdness. A puzzling series of dental explosions beginning in the nineteenth century is just one of many strange tales that have long lain undiscovered in the pages of old medical journals. Award-winning medical historian Thomas Morris delivers one of the most remarkable, cringe-inducing collections of stories ever assembled. Witness Mysterious Illnesses (such as the Rhode Island woman who peed through her nose), Horrifying Operations (1781: A French soldier in India operates on his own bladder stone), Tall Tales (like the "amphibious infant" of Chicago, a baby that could apparently swim underwater for half an hour), Unfortunate Predicaments (such as that of the boy who honked like a goose after inhaling a bird's larynx), and a plethora of other marvels. Beyond a series of anecdotes, these painfully amusing stories reveal a great deal about the evolution of modern medicine. Some show the medical profession hopeless in the face of ailments that today would be quickly banished by modern drugs; but others are heartening tales of recovery against the odds, patients saved from death by the devotion or ingenuity of a conscientious doctor. However embarrassing the ailment or ludicrous the treatment, every case in The Mystery of the Exploding Teeth tells us something about the knowledge (and ignorance) of an earlier age, along with the sheer resilience of human life.

"Delightfully horrifying."--Popular Science One of Mental Floss's Best Books of 2018 One of Science Friday's Best Science Books of 2018 · A mysterious epidemic of dental explosions... · A teenage boy who got his wick stuck in a candlestick... · A remarkable woman who, like a human fountain, spurted urine from virtually every orifice... These are just a few of the anecdotal gems that have until now lain undiscovered in medical journals for centuries. This fascinating collection of historical curiosities explores some of the strangest cases that have perplexed doctors across the world. From seventeenth-century Holland to Tsarist Russia, from rural Canada to a whaler in the Pacific, many are monuments to human stupidity – such as the sailor who swallowed dozens of penknives to amuse his shipmates, or the chemistry student who in 1850 arrived at a hospital in New York with his penis trapped inside a bottle, having unwisely decided to relieve himself into a vessel containing highly reactive potassium. Others demonstrate exceptional surgical ingenuity long before the advent of anaesthesia – such as a daring nineteenth-century operation to remove a metal fragment from beneath a conscious patient's heart. We also hear of the weird, often

Get Free The Mystery Of The Exploding Teeth And Other Curiosities From The History Of Medicine

hilarious remedies employed by physicians of yore – from crow’s vomit to port-wine enemas – the hazards of such everyday objects as cucumbers and false teeth, and miraculous recovery from apparently terminal injuries. Blending fascinating history with lacerating wit, *The Mystery of the Exploding Teeth* will take you on a tour of some of the funniest, strangest and most wince-inducing corners of medical history.

Someone has just blown up the biggest cheese factory in town, and Detective Inspector Octavius O'Malley, of the Rodent Police is on the case. Even as the steaming globs of cheese are still running down the walls, it becomes clear that there is something very strange about this case and something stranger still about Octavius O'Malley himself! Before this journey is over you will meet the most evil rat in the world; take a strange trip through the sewers and over the rooftops of town; and discover a hidden diary in a most unexpected place. there will be a dangerous train journey, two kidnappings, three narrow escapes and a poisonous plot that threatens to destroy Octavius O'Malley's world forever. And as if that weren't enough, there is a fat ginger cat lurking in an alley... Ages: 9-13

In August 1988, Zia gets into the presidential plane, Pak One, which explodes midway. Who killed him? The army generals growing old waiting for their promotions, the CIA, the ISI, RAW, or Ali Shigri, a junior officer at the military academy whose father, a whisky-swilling jihadi colonel, was murdered by the army? *A Case of Exploding Mangoes* is sharp, black, inventive, and utterly gripping. It marks the debut of a brilliant new writer.

Bogs, brains and bonkersness make this the perfect read for fans of David Walliams, Simon Mayo and Liz Pichon. Shortlisted for both the Redbridge Children's Book Award and the Leeds Book Awards 2014 and WINNER of Worcestershire's Awesomest Book! award Quirky twelve-year-old Noelle Hawkins may be the brightest student in her class, but even she is completely miffed to explain how her dad, wacky scientist Brian, "Big Brain" Hawkins, spontaneously combusted while sitting in a portaloos. It's true that he was working on a new top secret Brain Ray machine and was on the point of a great break-through . . . could this have had something to do with it? Know-All is sure all is not as it seems. With the help of her grumpy sister, Holly, she is determined to find out what really happened to her dad! "The ideal read for anyone who loves a mystery (in a toilet)" *Sunday Express*

While at the old barn to complete his initiation into the Gun Lake Gang, Johnnie stumbles onto a CD-pirating ring, and the gang decides to investigate

“A rollicking history of the telephone system and the hackers who exploited its flaws.” —Kirkus Reviews, starred review Before smartphones, back even before the Internet and personal computers, a misfit group of technophiles, blind teenagers, hippies, and outlaws figured out how to hack the world’s largest machine: the telephone system. Starting with Alexander Graham Bell’s revolutionary “harmonic telegraph,” by the middle of the twentieth century the phone system had grown into something extraordinary, a web of cutting-edge switching machines and human operators that linked together millions of people like never before. But the network had a billion-dollar flaw, and once people discovered it, things would never be the same. *Exploding the Phone* tells this story in full for the first time. It traces the birth of long-distance communication and the telephone, the rise of AT&T’s monopoly, the creation of the sophisticated machines that made it all work, and the

Get Free The Mystery Of The Exploding Teeth And Other Curiosities From The History Of Medicine

discovery of Ma Bell's Achilles' heel. Phil Lapsley expertly weaves together the clandestine underground of "phone phreaks" who turned the network into their electronic playground, the mobsters who exploited its flaws to avoid the feds, the explosion of telephone hacking in the counterculture, and the war between the phreaks, the phone company, and the FBI. The product of extensive original research, *Exploding the Phone* is a groundbreaking, captivating book that "does for the phone phreaks what Steven Levy's *Hackers* did for computer pioneers" (*Boing Boing*). "An authoritative, jaunty and enjoyable account of their sometimes comical, sometimes impressive and sometimes disquieting misdeeds." —*The Wall Street Journal* "Brilliantly researched." —*The Atlantic* "A fantastically fun romp through the world of early phone hackers, who sought free long distance, and in the end helped launch the computer era." —*The Seattle Times*

When Alex Dolan is hired by multibillionaire Stanislaw Clayton to write a book about the Sioux Crossing Supercollider, it seems like a dream job. Then something goes wrong at the site. Very wrong. After the incident, Dolan finds himself changed, and the only one who can stop the disaster from destroying us all.
