The earliest heart-shaped charges in heraldry appear in the 12th century; the hearts in the coat of arms of Denmark go back to the royal banner of the kings of Denmark, in turn based on a seal used as early as the 1190s. However, while the charges are clearly heart-shaped, they did not in origin depict hearts, or symbolize any idea related to love.

This study is the first thorough analysis of the extent of the opposition to the Great War in Wales, and is the most extensive study of the anti-war movement in any part of Britain. It is, therefore, a significant contribution to our understanding of people's responses to the conflict, and the difficulty of mobilising the population for total war. The anti-war movement in Wales and beyond developed quickly from the initial shock of the declaration of war, to the civil disobedience of anti-war activists and the industrial discontent excited by the Russian Revolution and experienced in areas such as the south Wales coalfield in 1917. The differing responses to the war within Wales are explored in this book, which charts how the pacifist tradition of nineteenth-century Welsh Nonconformity was quickly overturned. The two main elements of the anti-war movement are analysed in depth: the pacifist religious opposition, the Fellowship of Reconciliation, and the Nonconformist dissidents who were particularly influential in north and west Wales; and the political opposition concentrated in the Independent Labour Party and among the radical left within the South Wales Miners' Federation.

Born in the village of Llangeinor, near Bridgend in south Wales, Richard Price (1723-1811) was, to his contemporaries, an apostle of liberty, an enemy to tyranny and a great benefactor of the

human race. His friend Benjamin Franklin described aspects of his work as "the foremost production of human understanding that this century has afforded us". A supporter of the American and French Revolutions, Price corresponded with the likes of Jefferson, Adams, Washington, Mirabeau and Condorcet. In November 1789 he publicly welcomed the start of the French Revolution and thus inspired not only Edmund Burke to write his rebuttal in *Reflections on the Revolution in France*, but also the *Revolution Controversy*, "the most crucial ideological debate ever carried on in English". Price also brought to world attention the Bayes-Price Theorem on probability, which is the invisible background to so much in modern life, and wrote a fundamental text on moral philosophy. Yet, despite all this and more, he remains little-known beyond academia, a situation that this biography helps to rectify. Liberty's Apostle tells his life story through his published works and, fully for the first time, his now published correspondence with a host of eighteenth century celebrities. The life revealed is of a truly remarkable Welshman and, as Condorcet remarked, of "one of the formative minds" of the eighteenth century Enlightenment.

Street processions were a defining feature of life in the Victorian town, and this book examines how those events created new civic identities in the growing towns of nineteenth-century south Wales.

prehistory and antiquity, complete with accounts of the Celts in Germany, France, Italy, Iberia and Asia Minor. Part Two follows the Celts from the departure of the Romans to the late Middle Ages, including the migrations to and settlements in Ireland, Wales, Scotland and Brittany. This section also includes discussions of the Celtic kingdoms and the significance of Christianisation. Part Three brings the history of the Celts up to the present, covering the assimilation of the Celts within the national cultures of Great Britain, France and Ireland. Included in this consideration are the suppression of Gaelic, the declines, revivals and survivals of languages and literatures, and the histories of Celtic culture. The book concludes with a discussion of the recent history of the meaning of 'Celtic' and an examination of the cultural legacy of the Celts in the modern era.
