Shit Hits the Fan (SHTF) The End of the World As We Know It (TEOTWAWKI), A World without Rule or Law (WROL). This is what Preppers prepare for. Bug-out Vehicle (BOV), Bug-out Bag (BOB), Bug-out Location (BOL), Bug-out Directions (BOD). This is the language of the Prepper. This handbook will provide individuals, families, or groups access to the unique mindset of those survivalists called Preppers. Preppers prepare for unknown circumstances, such as economic collapse, natural events, manmade catastrophes, and even the end of the world. Preppers come from all walks of life, ranging from blue-collar workers to white-collar executives running multimillion-dollar companies. The reality is that we're all Preppers in one way or another. When we go to the grocery store, we buy and store food for future meals. That's Prepping. When we save five hundred dollars in the bank for a rainy day, that's Prepping. When we buy first-aid supplies because they're on sale, that's Prepping. Preppers take those actions to a different level. They don't look out one week or even four weeks from now. Preppers look out months and even years from now. Preppers tend to store items in bulk and some in tons (e.g., wheat, beans, corn, etcetera). They preserve their food so it lasts for up to thirty years. They have multiple weapons, ranging from knives, bows, and guns all the way to homemade devices. Some Preppers have predetermined locations to Bug Out (BO) to should a catastrophe happen, while others have Bug-out Vehicles (BOV) to get them there. Preppers find peace of mind knowing that they have food, water, rifles, pistols, ammunition, shelter, heat, energy, and the experience to survive. They have knowledge and relationships that provide skills to construct, engineer, grow, preserve, forge, hunt, provide electricity, teach, and balance the requirements of the survival triangle. Preppers act alone as well as become part of a larger Prepper community. To help better understand Preppers, I present the survival triangle, which most Preppers use as a guide. The survival triangle demonstrates the basic foundation of Prepping, and as such I've labeled it the first tenet of Prepping. As a Prepper, I allow you to look through my eyes and share what I've learned and applied to my life. I provide numerous examples and methods of how you can become a Prepper, though not all are always practical. The point is to expose the reader to the Prepper and the many options a Prepper has. The word Prepper or Preppers does not signify or imply a formal organization or title to any person or group. In its simplest form Preppers are individuals, families, or groups that are prepared BEFORE a significant event occurs. Individuals I have talked with associate Preppers with doomsdayers, militants, lunatics, or outsiders. Because of this stigma many Preppers tend to remain silent or selective about their communications. They provide limited if any information on what they store, the quantities they store, and how they store their preps. Yet within the Prepper community there is significantly more freedom and sharing of knowledge and experiences. There is a feeling of community amongst Preppers, and many but not all are welcome. In this community you will learn and be exposed to a tremendous amount of information... It's often difficult to understand what a Prepper is because there is no common mold or practice other than the survival triangle. What you prep and how you prep depends on your experience, finances, network, and knowledge. You and I may prepare differently, but the goal is the same, which is to be prepared before a significant event occurs. Whether you like it or not, we all prepare for something, but are you ready to be called a Prepper?

This custom companion to the blockbuster National Geographic Channel series Doomsday Preppers is filled with how-to illustrations, "Prepper Profiles" of people in the show, and survival tips from preppers themselves. Handy and comprehensive, the manual offers valuable life-saving information to help prepare for the most devastating calamities. Episodes of this highly original show, which debuted in February 2012, explore the lives of otherwise ordinary Americans who are preparing for the end of the world as we know it. Preppers go to extraordinary lengths to plan for any of life's uncertainties, from constructing a home out of shipping containers and stockpiling 50,000 lbs. of food to practicing evacuation drills and hand-to-hand combat. This book is an essential component.

When Disaster strikes, will you be ready? It's a question we've all asked ourselves, and a question that is answered in great detail by an author who has survived multiple disasters not by going to extreme measures, but by taking preparation one step at a time to ready his household, his community and his mind. If you've ever thought that preparation would be too difficult to manage, then the information in this book will be a pleasant surprise. You'll be guided through the basics of survival and the necessities for leading a successful and healthy transition through emergencies and beyond. If you thought there was nothing left for you to learn from yet another prepper's guide, then the premise of this book will be a refreshing breath of air. Rather than teaching you to hunker down and hide, Buck Collins invites you to stretch out and lead. Become not only self-sufficient, but also heroic by focusing on empowering yourself and those around you even in the most challenging circumstances. Rather than being another passive read to set on the shelf beside your edible plant references and the seven other survival books, this interactive book will help you to actively prepare your food, water and supplies, and it will teach you the value of the human spirit amidst the most terrifying and deadly circumstances. Here is just a fraction of what you'll learn from The Prepper's Survival Handbook: 10 foods to store and how best to keep them How to secure clean drinking water What to keep in your first-aid kit and how to deliver life-saving techniques even in harsh conditions How to maintain a healthy and functional household during duress 5 ways to support your children through all that will come up for them How to support yourself or others with disabilities or illnesses 8 tips to master your mind and maintain your mental health A step by step plan to develop and deliver an Emergency Plan both in your household and your community And it doesn't stop there! Don't be another hoarder, holed up in the pandemic of fear. Become a hero for yourself and your loved ones. Your efforts and your vision will contribute to a world of properly prepared people who can teach, lead, and prosper regardless of what Mother Nature and mankind can throw at you! Order this book now and find out what it takes to become a truly prepped survivalist before it's too late.
