Stages of Faith: The psychology of human development and the quest for meaning by James W. Fowler, Harper Collins, 1981, 348 ff. Each person's faith is unique, yet faith is also universal. It is fundamental, mysterious, and infinitely varied. So says James W. Fowler in the introduction to his most popular work, 'Stages of Faith'.

In The Quest for Meaning, Tariq Ramadan, philosopher and Islamic scholar, invites the reader to join him on a journey to the deep ocean of religious, secular, and indigenous spiritual traditions to explore the most pressing contemporary issues. Along the way, Ramadan interrogates the concepts that frame current debates including: faith and reason, emotions and spirituality, tradition and modernity, freedom, equality, universality, and civilization. He acknowledges the greatest flashpoints and attempts to bridge divergent paths to a common ground between these religious and intellectual traditions. He calls urgently for a deep and meaningful dialogue that leads us to go beyond tolerant co-existence to mutual respect and enrichment. Written in a both direct and meditative style this is an important, timely and intelligent book that aims to direct and shape debate around the most important questions of our time.

'This book is a journey, and an initiation.' In a world so full of different beliefs and viewpoints, how can we find peace in our shared humanity? The Quest for Meaning will take you on a journey to discover the profound truths that bind us all together. Acclaimed thinker and philosopher Tariq Ramadan explores universal ideas such as love, respect, truth and tolerance, and examines questions such as how can men and women relate to each other? What is the true nature of equality? What does 'civilization' really mean? In doing so, he opens our minds to a new view of humanity. Whether we are Christian or Buddhist, Jewish or Muslim, secularist or believer, he reveals that all traditions of thought spring from the same place, and guides us to see past what divides us and discover the beauty of what we have in common. This book has resonance for all of us, showing why, eventually, all different spiritual paths lead to the human heart.

In The Quest for Meaning, Tariq Ramadan, philosopher and Islamic scholar, invites the reader to join him on a journey to the deep ocean of religious, secular, and indigenous spiritual traditions to explore the most pressing contemporary issues. Along the way, Ramadan interrogates the concepts that frame current debates including: faith and reason, emotions and spirituality, tradition and modernity, freedom, equality, universality, and civilization. He acknowledges the greatest flashpoints and attempts to bridge divergent paths to a common ground between these religious and intellectual traditions. He calls urgently for a deep and meaningful dialogue that leads us to go beyond tolerant co-existence to mutual respect and enrichment. Written in a both direct and meditative style this is an important, timely and intelligent book that aims to direct and shape debate around the most important questions of our time.

How can developing countries grow their economies? Most answers to this question center on what the rich world should or shouldn't do for the poor world. In The Quest for Prosperity, Justin Yifu Lin(the first non-Westerner to be chief economist of the World Bank)focuses on what developing nations can do to help themselves. Lin examines how the countries that have succeeded in developing their own economies have actually done it. Intwoven with insights, observations, and stories from Lin's travels as chief economist of the World Bank and his reflections on China's rise, this book provides a road map and hope for those countries engaged in their own quest for prosperity.

In an unorthodox approach, Georgetown University professor Cal Newport debunks the long-held belief that "follow your passion" is good advice, and sets out on a quest to discover the reality of how people end up loving their careers. Not only are pre-existing passions rare and have little to do with how most people end up loving their work, but a focus on passion over skill can be dangerous, leading to anxiety and chronic job hopping. Spending time with organic farmers, venture capitalists, screenwriters, freelance computer programmers, and others who admitted to deriving great satisfaction from their work, Newport uncovers the strategies they used and the pitfalls they avoided in developing their compelling careers. Cal reveals that matching your job to a pre-existing passion does not matter. Passion comes after you put in the hard work to become excellent at something valuable, not before. In other words, what you do for a living is much less important than how you do it. With a title taken from the comedian Steve Martin, who once said his advice for aspiring entertainers was to "be so good they can't ignore you," Cal Newport's clearly written manifesto is mandatory reading for anyone fretting about what to do with their life, or frustrated by their current job situation and eager to find a fresh new way to take control of their livelihood. He provides an evidence-based blueprint for creating work you love, and will change the way you think about careers, happiness, and the crafting of a remarkable life.

"Discusses the fundamental assumptions regarding the foundations of Pakistani nationalism as well as our current understanding of the roots of its postcolonial identity crisis" -

Demonstrates how the competition to solve pressing energy problems has become an engine of political and economic change, and shares inside stories of current and developing energy sources from different world regions.

Listen to people in every field and you'll hear a call for more sophisticated leadership/for leaders who can solve more complex problems than the human race has ever faced. But these leaders won't simply come to the fore; we have to develop them, and we must cultivate them as quickly as is humanly possible. Changing on the Job is a means to this end. As opposed to showing readers how to play the role of a leader in a "paint by numbers" fashion, Changing on the Job builds on theories of adult growth and development to help readers become more thoughtful individuals, capable of leading in any scenario. Moving from the theoretical to the practical, and employing real-world examples, author Jennifer Garvey Berger offers a set of building blocks to help cultivate an agile workforce while improving performance. Coaches, HR professionals, thoughtful leaders, and anyone who wants to flourish on the job will find this book a vital resource for developing their own capacities and those of the talent that they support.

Dr. James Fowler has asked these questions, and others like them, of nearly six hundred people. He has talked with men, women, and children of all ages, from four to eighty-eight, including Jews, Catholics, Protestants, agnostics, and atheists. In many cases, the interviews became in-depth conversations that provided rare, intimate glimpses into the various ways our lives have meaning and purpose, windows into what this books calls faith. Faith, as approached here, is not necessarily religious, nor is it to be equated with belief. Rather, faith is a person's way of leaning into and making sense of life. More verb than noun, faith is the dynamic system of images, values, and commitments that guide one's life. It is thus universal: everyone who chooses to go on living operated by some basic faith. Building on the contributions of such key thinkers as Piaget, Erikson, and Kohlberg, Fowler draws on a wide range of scholarship, literature, and firsthand research to present expertly and engagingly the six stages that emerge in working out the meaning of our lives—from the intuitive, imitative faith of childhood through conventional and then more independent faith to the universalizing, self-transcending faith of full maturity. Stages of Faith helps us to understand our own pilgrimage of faith, the passages of our own quest for meaning and value.

Jonathan Fields knows the risks-and potential power-of uncertainty. He gave up a six-figure income as a lawyer to make \$12 an hour as a personal trainer. Then, married with a 3-month old baby, he signed a lease to launch a yoga center in the heart of New York City... the day before 9/11. But he survived, and along the way he developed a fresh approach to transforming uncertainty, risk of loss, and exposure to judgment into catalysts for innovation, creation, and achievement. Properly understood and harnessed, fear and uncertainty can become fuel for creative genius rather than sources of pain, anxiety, and suffering. In business, art, and life, creating at a world-class level demands bold action and leaps of faith in the face of great uncertainty. But that uncertainty can lead to fear, anxiety, paralysis, and destruction. It can gut creativity and stifle innovation. It can keep you from taking the risks necessary to do great work and craft a deeply-rewarding life. And it can bring companies that rely on innovation grinding to a halt. That is, unless you know how to use it to your advantage. Fields draws on leading-edge technology, cognitive-science and ancient awareness-focusing techniques in a fresh, practical, non-dogmatic way. His approach enables creativity and productivity on an entirely different level and can turn the once-tortuous journey into a more enjoyable quest. Fields will reveal how to: Make changes to your workflow that unlock buried creative potential. Build "creation hives" --supportive groups that can supercharge and humanize the process. Tap social technology and user co-creation to add clarity, certainty, and sanity, even if you're an artist or solo-creator. Develop a set of personal practices and mindset shifts that let you not just tolerate, but invite and even amplify, uncertainty as a catalyst for genius. Drawing on extensive case studies and research, Fields shares a set of detailed personal practices and environmental changes that can not only humanize the creative process, but also allow individuals and teams to stay more open to opportunity and play a bigger creative game.
