Rick Jolly was the Senior Medical Officer in the Falklands, setting up and running the field hospital at Ajax Bay, where he and his Royal Marine and Parachute Regiment medical teams treated a total of 580 casualties, of which only 3 died of wounds. The building itself was a derelict meat-packing factory, hastily converted to treat incoming wounded – both British and Argentine – even though two unexploded bombs lay at the back of the building. Rick's diary of the campaign and its aftermath is a fast-paced and gripping account of war experience that covers the entire conflict from initial preparations and passage to the South Atlantic on the requisitioned liner Canberra to daily action reports, and observations and interaction with the key players of the conflict – Col. H. Jones, Brian Hanrahan, Julian Thompson and Max Hastings. Incredible human stories abound, as Rick, a trained commando, dangles from the rescue winch of a Sea King helicopter, saving lives on a daily basis. Yet he also confronts death in a thoughtful, reflective and considered way, helping others to deal with the trauma of war. Now revised and brought fully up to date, this book is a unique first-hand narrative of a conflict that inspired individual and collective heroism among British armed forces, inspiring great pride in 'our boys' by the public back at home, but which also provoked – and continues to provoke – fierce debate.

Socialist and republican Frank Ryan is best remembered for his leadership of Irishmen in the Spanish Civil War and his collusion with Nazi Germany against Britain. But his earlier life is equally revealing of the man and his times, thanks to his highly active role in both political agitation and the ideological debates which divided Ireland and shaped Europe between the wars.

Among its many gems of advice, this book shows how to cook with acetylene, take revenge on a lawn mower, measure a hat size with a two-by-four, reduce carbon footprint (it involves moving into a fruit tree located next to a liquor store), and make alternative fuel (which involves an empty propane tank and a full septic one).

A novel about a troubled Irish family on the eve of the Easter Rising by a Man Booker Prize-winning author. In 1916, with the First World War raging across Europe, Andrew Chase-White, lieutenant in the British army, travels to Ireland to see his family. Though he was raised in England by Protestant parents, many of his relations still live on the Emerald Isle, and are Catholic and nationalist through and through. Andrew 's arrival in Dublin is the only spark needed to ignite old resentments, new passions, political tensions, and religious crises, sending the family into a torrent of fights and alliances, affairs and betrayals. And as the historic gunfire begins at the General Post Office on the day of the Easter Rebellion, the lives of Andrew and his relations will be indelibly changed. At once an exploration of the tumultuous political landscape of World War I Dublin and an examination of family, love, and loyalty, The Red and the Green is a compelling novel of Englishness and Irishness that continues to stand the test of time and history.

A green lion. A red light. And one very unusual day. As a green lion waits for a green traffic light, some surprises appear, such as lightning, a lilac, library books and lima beans. Or rather, " li-ghtning, " " li-lac, " " li-brary books, " and " li-ma beans " because each spread ends with " Red light, green li-, " and the reader must turn the page to see the whole word — and what 's happened. Through it all, the lion calmly and helpfully deals with whatever shows up, and philosophically muses about the way life can be. " Some days are not like most days, " the lion explains. But as all children know: those days are usually the most fun!

An insider tells how environmentalists and animal rights activists have become "the number one domestic terrorism threat."

Everyone knows they need to eat more fruits and vegetables, but consuming even the minimum FDA-recommended five servings a day can be challenging. In Green for Life, raw foods pioneer Victoria Boutenko presents an overlooked powerhouse of nutrition in this equation: greens. For their bounty of minerals and nutrients, greens exceed other vegetables in value. Green for Life details the immense health benefits of greens and suggests an easy way to consume them in sufficient quantities: the green smoothie. This quick, simple drink benefits everyone, regardless of lifestyle, diet, or environment. Green smoothies eliminate toxins, correct nutritional deficiencies, and are delicious as well. Green for Life includes the latest information on the abundance of protein in greens, the benefits of fiber, the role of greens in homeostasis, the significance of stomach acid, how greens make the body more alkaline, the healing power of chlorophyll, and more. Also included are the results of a pilot study demonstrating the effectiveness of adding just one quart of green smoothies a day to one 's diet, without changing anything else in dietary intake. Green smoothie testimonials and recipes give readers confidence and motivation in exploring green smoothies for themselves. This updated edition offers important new research on the role that omega-3 and omega-6 fatty acids play in metabolic health and includes nutritional data on select green smoothies and updated findings on organic versus conventional produce. Offering more in-depth nutritional and experiential information than Boutenko 's recently released Green Smoothie Revolution, Green for Life makes an ideal companion piece to its recipe-rich successor. #1 NEW YORK TIMES BESTSELLER • Discover the life-changing memoir that has inspired millions of readers through the Academy Award®-winning actor 's unflinching honesty, unconventional wisdom, and lessons learned the hard way about living with greater satisfaction. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE GUARDIAN " McConaughey 's book invites us to grapple with the lessons of his life as he did—and to see that the point was never to win, but to understand. " —Mark Manson, author of The Subtle Art of Not Giving a F*ck " I've been in this life for fifty years, been trying to work out its riddle for forty-two, and been keeping diaries of clues to that riddle for the last thirty-five. Notes about successes and failures, joys and sorrows, things that made me marvel, and things that made me laugh out loud. How to be fair. How to have less stress. How to have fun. How to hurt people less. How to get hurt less. How to be a good man. How to work up the courage to sit down with those diaries. I found stories I experienced, lessons I learned and forgot, poems, prayers, prescriptions, beliefs about what matters, some great photographs, and a whole bunch of bumper stickers. I found a reliable theme, an approach to living that gave me more satisfaction, at the time, and still: If you know how, and when, to deal with life 's challenges—how to get relative with the inevitable—you can enjoy a state of success I call " catching greenlights. " So I took a one-way ticket to the desert and wrote this book: an album, a record, a story of my life so far. This is fifty years of my sights and seens, felts and figured-outs, cools and shamefuls. Graces, truths, and beauties of brutality. Getting away withs, getting caughts, and getting wets while trying to dance between the raindrops. Hopefully, it 's medicine that tastes good, a couple of aspirin instead of the infirmary, a spaceship to Mars without needing your pilot 's license, going to church without having to be born again, and laughing through the tears. It 's a love letter. To life. It 's also a guide to catching more greenlights—and to realizing that the yellows and reds eventually turn green too. Good luck.
