business securitization.

This book uniquely applies securitization theory to the mass sexual violence atrocities committed during the Bosnia war and the Rwandan genocide. Examining the inherent links between rape, war and global security, Hirschauer analyses the complexities of conflict related sexual violence.

This book provides an in-depth analysis of how mobilization and legitimation for war are made possible, with a focus on Russia's conflict with Chechnya. Through which processes do leaders and their publics come to define and accept certain conflicts as difficult to engage in, and others as logical, even necessary? Drawing on a detailed study of changes in Russia's approach to Chechnya, this book argues that 're-phrasing' Chechnya as a terrorist threat in 1999 was essential to making the use of violence acceptable to the Russian public. The book refutes popular explanations that see Russian war-making as determined and grounded in a sole, authoritarian leader. Close study of the statements and texts of Duma representatives, experts and journalists before and during the war demonstrates how the Second Chechen War was made a 'legitimate' undertaking through the efforts of many. A post-structuralist reinterpretation of securitization theory guides and structures the book, with discourse theory and method employed as a means to uncover the social processes that make war acceptable. More generally, the book provides a framework for understanding the broad social processes

that underpin legitimized war-making. This book will be of much interest to students of Russian politics, critical terrorism studies, security studies and international relations.

This book seeks to interrogate how contemporary policy issues become 'securitized' and, furthermore, what the implications of this process are. A generation after the introduction of the concept of securitization to the security studies field, this book engages with how securitization and desecuritization 'works' within and across a wide range of security domains including terrorism and counter-terrorism, climate change, sexual and gender-based violence, inter-state and intra-state conflict, identity, and memory in various geographic and social contexts. Blending theory and application, the contributors to this volume – drawn from different disciplinary, ontological, and geographic 'spaces' – orient their investigations around three common analytical objectives: revealing deficiencies in and through application(s) of securitization; considering securitization through speech-acts and discourse as well as other mechanisms; and exposing latent orthodoxies embedded in securitization research. The volume demonstrates the dynamic and elastic quality of securitization and desecuritization as concepts that bear explanatory fruit when applied across a wide range of security issues, actors, and audiences. It also reveals the deficiencies in restricting securitization research to an overly narrow set of issues, actors, and mechanisms. This volume will be of great interest to scholars of critical security studies, international security, and International Relations. The eleven-year civil war in Sierra Leone from 1991 to 2002 was incomprehensibly brutal—it is estimated that half of all female refugees were raped and many thousands were killed. While the publicity surrounding sexual violence helped to create a general picture of women and girls as victims of the conflict, there has been little effort to understand female soldiers' involvement in, and experience of, the conflict. *Female Soldiers in Sierra Leone* draws on interviews with 75 former female soldiers and over 20 local experts, providing a rare perspective on both the civil war and post-conflict development efforts in the country. Megan MacKenzie argues that post-conflict reconstruction is a highly gendered process, demonstrating that a clear recognition and understanding of the roles and experiences of female soldiers are central to both understanding the conflict and to crafting effective policy for the future.

This volume aims to provide a new framework for the analysis of securitization processes, increasing our understanding of how security issues emerge, evolve and dissolve. Securitisation theory has become one of the key components of security studies and IR courses in recent years, and this book represents the first attempt to provide an integrated and rigorous overview of securitization practices within a coherent framework. To do so, it organizes securitization around three core assumptions which make the theory applicable to empirical studies: the centrality of audience, the co-dependency of agency and context and the structuring force of the dispositive. These assumptions are then investigated through discourse analysis, process-tracing, ethnographic research, and content analysis and discussed in relation to extensive case studies. This innovative new book will be of much interest to

students of securitisation and critical security studies, as well as IR theory and sociology. Reports of sexual violence in armed conflict frequently appear in political discussions and news media, presenting a stark contrast to a long history of silence and nonrecognition. Conflict-related sexual violence has transitioned rapidly from a neglected human rights issue to an unambiguous security concern on the agendas of powerful states and the United Nations Security Council. Through interviews and primary-source evidence, Kerry F. Crawford investigates the reasons for this dramatic change and the implications of the securitization of sexual violence. Views about wartime sexual violence began changing in the 1990s as a result of the conflicts in the former Yugoslavia and Rwanda and then accelerated in the 2000s. Three case studies—the United States' response to sexual violence in the Democratic Republic of Congo, the adoption of UN Security Council Resolution 1820 in 2008, and the development of the United Kingdom's Preventing Sexual Violence in Conflict Initiative—illustrate that use of the weapon of war frame does not represent pure co-optation by the security sector. Rather, well-placed advocates have used this frame to advance the antisexual violence agenda while simultaneously working to move beyond the frame's constraints. This book is a groundbreaking account of the transformation of international efforts to end wartime sexual violence.

Rape and other forms of sexual violence have always been a feature of war. Yet it is only fairly recently that researchers have identified rape as a deliberate tool of war-making rather than simply an inevitable side effect of armed conflict. Much of the emerging literature has suggested that the underlying causes of rape stem from a single motivation-whether individual, symbolic, or strategic-leading to disagreement in the field about how we can understand and respond to the causes and consequences of sexual violence in war. In *Rape Loot Pillage*, Sara Meger argues that sexual violence is a form of gender-based political violence (perpetrated against both men and women) and a manifestation of unequal gender relations that are exacerbated by the social, political, and economic conditions of war. She looks at trends in the form and function of sexual violence in recent and ongoing conflicts to contend that, in different contexts, sexual violence takes different forms and is used in pursuit of different objectives. For this reason, no single framework for addressing conflict-related sexual violence will be sufficient. Taking a political economy perspective, Meger maintains that these variations can be explained by broader struggles over territory, assets, and other productive resources that motivate contemporary armed conflicts. Sexual violence is a reflection of global political economic struggles, and can't be addressed only at the local level-it must be addressed through regional and international policy. She concludes by providing some initial ideas about how this can be done via the UN and national governments.

This book explores everyday realities of young Muslim women in Britain, who are portrayed as antithetical to the British way of life in media and political discourse. The book captures how geo-political events, and national tragedies continue to implicate individuals and communities at the domestic and local level, communities that have no connection to such tragedies and events, other than being associated with a religio-ethnic identity. The author shows how Muslim women are caught within the spectrum of the vulnerable-fanatic, always perceived to be 'at risk' of being 'radicalized'. Focusing on educated Muslim females, the book explores experiences of Islamophobia and securitization inside and outside educational institutions, and highlights individual and group acts of resistance through dialogue, with Muslim women challenging the metanarrative of insecurity and suspicion that plagues their everyday existence in Britain. Islamophobia and Securitization will be of interest to scholars and students researching Muslims in the West, in particular sociologists, anthropologists, and political scientists. It will also appeal to analysts and academics researching security and terrorism, race and racialization, as well as gender, immigration, and diaspora.

This book defines the relationship between gender and international security, analyzing and critiquing international security theory and practice from a gendered perspective. Gender issues have an important place in the international security landscape, but have been neglected both in the theory and practice of international security. The passage and implementation of UN Security Council Resolution 1325 (on Security Council operations), the

integration of gender concerns into peacekeeping, the management of refugees, post-conflict disarmament and reintegration and protection for non-combatants in times of war shows the increasing importance of gender sensitivity for actors on all fronts in global security. This book aims to improve the quality and quantity of conversations between feminist security studies and security studies more generally, in order to demonstrate the importance of gender analysis to the study of international security, and to expand the feminist research program in Security Studies. The chapters included in this book not only challenge the assumed irrelevance of gender, they argue that gender is not a subsection of security studies to be compartmentalized or briefly considered as a side issue. Rather, the contributors argue that gender is conceptually, empirically, and normatively essential to studying international security. They do so by critiquing and reconstructing key concepts of and theories in international security, by looking for the increasingly complex roles women play as security actors, and by looking at various contemporary security issues through gendered lenses. Together, these chapters make the case that accurate, rigorous, and ethical scholarship of international security cannot be produced without taking account of women's presence in or the gendering of world politics. This book will be of interest to all students of critical security studies, gender studies and International Relations in general. Laura Sjoberg is Assistant Professor of Political Science at the University of Florida. She has a Phd in International Relations and Gender Studies from the University of Southern California and is the author of *Gender, Justice, and the Wars in Iraq* (2006) and, with Caron Gentry, *Mothers, Monsters, Whores: Women's Violence in Global Politics* (2007)
