This book can be a godsend for many persons--for those who suffer from alcohol addiction, for their friends and loved ones, and for those in the relevant helping professions. Its central message is that alcoholism is primarily a metabolic disease that should be treated with due consideration of its physiological roots. The old moralistic approach and the more recent behavioral and psychological treatment approaches have a dismal record of failure, largely because they pay little or no attention to the crucial physiological and nutritional needs of alcoholics.

deploys an opiate-blocking medication in a very specific way—in combination with ongoing drinking—to extinguish the addictive "software" in the brain. The de-addiction process rolls back the addictive mechanism in the brain to its original pre-addicted state—before the first drink was consumed, making this program an actual cure for alcoholism. Drs. Roy Eskapa and David Sinclair of The Sinclair Method have put together a sound scientific book that proves that with this particular method, alcoholism can be cured in more than 78 percent of patients. What's more, the treatment avoids the dangerous withdrawal symptoms, allowing patients to detox gradually and safely while they are still drinking. This removes the need for expensive and unpleasant inpatient rehabilitation programs. Actual drinking levels and cravings automatically decrease until control over alcohol is restored. The

Whether it involves drugs, alcohol, smoking, or food, addiction is an overwhelming and destructive force. While many rehabilitation programs are available, the truth is that too many people return to their old habits. Why? End Your Addiction Now not only explores the biochemical factors that are the real cause of this problem, but offers proven advice on how

to break addictions once and for all. Based upon the research and experience of Dr. Charles Gant and other pioneers, this practical handbook provides simple step-by-step directions for kicking the habit. Perhaps most unique, *End Your Addiction Now* is designed both to guide its readers to effective physicians and treatment facilities, and to provide a path for those who wish to seek wellness on their own. At the heart of Dr. Gant's approach is a distinctive program of nutritional supplements designed to jump-start recovery by reducing substance cravings. Dr. Gant then walks readers through a natural process of detoxification and biochemical testing that pinpoints the specific deficiencies that must be addressed to achieve complete recovery.

Scientific research continually indicates nationwide vitamin and mineral deficiencies in our country, and we spend over a trillion dollars each year on disease care.
