the world's fossil-fuel-powered cars. Global animal agriculture is responsible for deforestation, soil erosion, and more emissions than air travel, paper mills, and coal mining combined. It also, of course, depends on the slaughter of more than 60 billion animals per year, a number that is only increasing as the global appetite for meat swells. But a band of doctors, scientists, activists, and entrepreneurs have been racing to end animal agriculture as we know it, hoping to fulfill a dream of creating meat without ever having to kill an animal. In the laboratories of Silicon Valley companies, Dutch universities, and Israeli startups, visionaries are growing burgers and steaks from microscopic animal cells and inventing systems to do so at scale--allowing us to feed the world without slaughter and environmental devastation. Drawing from exclusive and unprecedented access to the main players, from polarizing activist-turned-tech CEO Josh Tetrick to lobbyists and regulators on both sides of the issue, Billion Dollar Burger follows the people fighting to upend our food system as they butt up against the entrenched interests fighting viciously to stop them. The stakes are monumentally high: cell-cultured meat is the best hope for sustainable food production, a key to fighting climate change, a gold mine for the companies that make it happen, and an existential threat for the farmers and meatpackers that make our meat today. Are we ready?

Behind every meal you eat, there is a story. *Hamburgers in Paradise* explains how. In this wise and passionate book, Louise Fresco takes readers on an enticing cultural journey to show how science has enabled us to overcome past scarcities—and why we have every reason to be optimistic about the future. Using hamburgers in the Garden of Eden as a metaphor for the confusion surrounding food today, she looks at everything from the dominance of supermarkets and the decrease of biodiversity to organic foods and GMOs. She casts doubt on many popular claims about sustainability, and takes issue with naïve rejections of globalization and the idealization of "true and honest" food. Fresco explores topics such as agriculture in human history, poverty and development, and surplus and obesity. She provides insightful discussions of basic foods such as bread, fish, and meat, and intertwines them with social topics like slow food and other gastronomy movements, the fear of technology and risk, food and climate change, the agricultural landscape, urban food systems, and food in art. The culmination of decades of research, *Hamburgers in Paradise* provides valuable insights into how our food is produced, how it is consumed, and how we can use the lessons of the past to design food systems to feed all humankind in the future.
