A history of the Late Antique world that is all emperors and barbarians, soldiers, landlords and tax-collectors would give as colourless and as unreal a picture of the quality of the age, as would an account devoted only to the sheltered souls, to the monks, the mystics, and the awesome theologians of that time.

focuses on the changes and continuities in Mediterranean society as a whole before the Arab conquests. Two new chapters survey the situation in the east after the death of Justinian and cover the Byzantine wars with Persia, religious developments in the eastern Mediterranean during the life of Muhammad, the reign of Heraclius, the Arab conquests and the establishment of the Umayyad caliphate. Using the latest in-depth archaeological evidence, this all-round historical and thematic study of the west and the eastern empire has become the standard work on the period. The new edition takes account of recent research on topics such as the barbarian 'invasions', periodization, and questions of decline or continuity, as well as the current interest in church councils, orthodoxy and heresy and the separation of the miaphysite church in the sixth-century east. It contains a new introductory survey of recent scholarship on the fourth century AD, and has a full bibliography and extensive notes with suggestions for further reading. The Mediterranean World in Late Antiquity 395-700 AD continues to be the benchmark for publications on the history of Late Antiquity and is indispensable to anyone studying the period.

Late Antiquity (ca. 250-650) witnessed the transition from Classical Antiquity to the Middle Ages in the Mediterranean and Near Eastern worlds. Christianity displaced polytheism over a wide area, offering new definitions of identity and community. The Roman Empire collapsed in Western Europe to be replaced by new "Germanic" kingdoms. In the East, Byzantium emerged, while the Persian Empire reached its apogee and collapsed. Arab armies carrying the banner of Islam reshaped the political map and brought the late antique era to a close. This sourcebook illustrates the dramatic political, social and religious transformations of Late Antiquity through the words of the men and women who experienced them. Drawing from Greek, Latin, Syriac, Hebrew, Coptic, Persian, Arabic and Armenian sources, the carefully chosen passages illuminate the lives of emperors, abbesses, aristocrats, slaves, children, barbarian chieftains, and saints. The Roman Empire is kept at the centre of the discussion, with chapters devoted to its government, cities, army, law, medicine, domestic life, philosophy, Christianity, polytheism, and Jews. Further chapters deal with the peoples who surrounded the Roman state: Persians, Huns, northern "Germanic" barbarians, and the followers of Islam. This revised and updated second edition provides an expanded view of Late Antiquity with a new chapter on domestic life, as well extra material throughout, including passages that appear for the first time in English translation. Readings in Late Antiquity is the only sourcebook that covers such a wide range of topics over the full breadth of the late antique period.

The era of late antiquity—from the middle of the third century to the end of the eighth—was marked by the rise of two world religions, unprecedented political upheavals that remade the map of the known world, and the creation of art of enduring glory. In these eleven in-depth essays, drawn from the award-winning reference work *Late Antiquity: A Guide to the Postclassical World*, an international cast of experts provides essential information and fresh perspectives on this period's culture and history.
