Therapeutic Arts in Pregnancy, Birth and New Parenthood explores the use of arts in relation to infertility, pregnancy, childbirth and new parenthood. It is

the first book to bring all these subjects together into one accessible volume with an international perspective. The book looks at the role of the arts in health with respect to the pregnancy journey, from conception to new parenthood. It introduces readers to the ways in which art is being used with women who are experiencing different stages of childbearing – who may be unable to conceive and are struggling with infertility treatment, or who experience miscarriage and loss, a traumatic birth, or grief over the loss of a baby. It also elucidates how art-making offers a means for women to express and understand their changed sense of self-identity and sexuality as a result of pregnancy and motherhood. The book has an international compass and is essential reading for arts therapy trainees and arts in health courses and will also be of interest to other health professionals and artists.

Working through the process of image-making in a therapeutic relationship, the art therapist is able to explore feelings, fantasies, and myths in different setting with diverse client groups. Originally published in 1987 *Images of Art Therapy* is a collection of essays by experienced art therapists which discuss and develop both theoretical and practical issues central to art therapy. The authors describe how they work through the use of illustrated case material which includes children, adolescents, and adults, in normal schools, psychiatric hospitals, therapeutic communities, and out-patient clinics. Theoretical considerations include bereavement, play, transference, symbolism, and verbal versus non-verbal communication. The first book on art therapy, *Art as Therapy*, edited by Tessa Dalley, was a useful introduction to the subject. *Images of Art Therapy* expands the issues raised in the earlier book in more depth, and develops new and innovative ideas which it was hoped, at the time, would influence both the theory and practice of art therapy in the future.
