The first time that we, the editors of this volume, met, a chance remark by one of us, newly returned from fieldwork in Fiji, quickly led to an animated discussion of our experiences doing anthropological research with children. Following that occasion, we began to seek each other out in order to continue such conversations, because we had found no other

opportunity to discuss these significant events. We knew our experiences were rich sources of cross-cultural data and stimuli to rethinking anthropological theory and methods. A cursory review of the literature on fieldwork revealed, to our surprise, that fieldworker's experiences with children were rarely and only briefly mentioned (Hostetler and Huntington, 1970, are an early exception). delineates here a pervasive "caudillaje" attitude toward life that is common to the Catholic part of the Western Hemisphere. Focusing on certain constants of Latin America's civic life, he offers implicit and explicit juxtapositions to Protestant-capitalist society, arguing that Latin America is a dualistic society that clearly distinguishes public and private realms. The book provides an exegesis of the Latin American mode of existence, illustrating the goals that are inherent in every Latin American's hope for deference and respect. Drawing on examples from everyday life, Dealy shows

how behaviors that might seem curious to North Americans are quite rational within Latin Americans' own frame of reference. He also furnishes a thumbnail description of how and where these behavioral virtues may be learned and practiced to one's advantage. In this provocative and fascinating study of thought, attitude, and behavior, Dr. Dealy illuminates Latin American exceptionalism. North Americans could learn much from Latin habits of private life, just as Latin Americans could profit from adapting some of our public institutions.
