Complete coverage of your Triumph Tiger 800 (10 - 14)

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

This is a comprehensive, visual history of the motorcycles from Britain that were bred in the US and Canada. Tuck in with Triumph Motorcycles in America and get ready for the ride of a lifetime. Triumphs have been part of North America's motorcycling soul since long before World War II. Born in Britain but bred in the US and Canada, Triumph's iconic models—Bonneville, Trophy, Thunderbird, Daytona, Tiger, Speed Twin, Speed Triple, and Rocket III—resonate deeply with enthusiasts who love their style, sound, performance, and undeniable coolness. It's not coincidental that Triumph was Steve McQueen's favorite ride. Triumph Motorcycles in America is packed with thorough, entertaining text, plus hundreds of historical images, most of them in color and never before published. This incredible volume of history and culture was written by award-winning professional journalist and lifelong Triumph fanatic Lindsay Brooke, with a foreword by America's favorite "Triumph guy," Peter Egan. Don't think twice about it, Triumph Motorcycles in America is a must-have for every fan of Britain's most legendary bike brand.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
