With the present book, we intend to give an account of Turkish foreign policy written by Turkish scientists and decision-makers. Up to now, countless treatises on the foreign policy of the Republic of Turkey have been published within the Anglo-American language area. The specialized literature is particularly extensive in the domain of Turkish European policy as well as on the Europeans' foreign policy towards Turkey and on security and defense policy. We are primarily interested in the self-perception of Turkish decision-makers and advisors who, as the scientific and bureaucratic elite, have a significant influence on the conception of Turkish foreign policy. We are interested in the elites' priorities in shaping the country's foreign policy. We hope that readers will be able to read the ideas, hopes, and fears between the lines of the contributions in order to form ideas for themselves. We also intend to bring the Turkish perspective to sectors outside the university. Moreover, we intend to draw an outline of scientific literature by means of which readers may immerse themselves in the subject.

This book describes the historical background of the Middle East and, in particular, Turkey, prior to the end of World War II. It takes up the various steps taken by the United States to combat Soviet moves

after the war to take over this strategic area. It describes the inception of the Truman Doctrine to rearm and strengthen Greece and Turkey in the face of British withdrawal, the unsuccessful efforts made by the United States and Britain to establish a Middle East command or defense organisation, and the successful U.S. efforts to get Turkey into NATO, which blocked Soviet entry. '...Ambassador McGhee has chronicled the events which led to Turkey's accession to NATO with great clarity and in a most interesting and readable fashion. He throws a fascinating light on the relationship between the United States of America and Turkey and the personalities involved. This book not only deserves to be read, but it deserves study by all of those who are interested in Defence and Foreign Affairs.' Lord Carrington

This is the second book of the two-volume History of the Ottoman Empire and Modern Turkey.

This book is not a conventional biography. It is not only a portrait of a larger-than-life Turkish diplomat, whose Foreign Service career spanned almost four decades - from 1941 to 1979 - but also offers a glimpse into the evolution of the organization of the Turkish Ministry of Foreign Affairs, and provides an account of the attitudes and

methods of the Ministry's officials. A good biography should cast light upon its subject's times as well as his - or her - life; upon the way things were done, as much as upon the way a particular individual reacted and behaved. As such, in this book, not only is Zeki Kuneralp the man addressed but also the great developments of his time are explored extensively. The book blends biographical narrative with explorations of various aspects of the foreign policy issues with which Kuneralp was involved. The book treats in detail the major problems with which Kuneralp was directly concerned at each of his postings: that is, meeting the right people abroad, promoting Turkish interests, reporting to the Ministry of Foreign Affairs, subordinating local matters to the political and economic goals of Turkey, and conducting diplomacy so as always to be in accord with Ankara's policy makers, whose big picture he always kept in mind.
