The authors make the point repeatedly that “A3 thinking” and the underlying philosophy of continuous improvement matter far more than the layout of reports. At Toyota, use of the A3 and PDCA methods has forged generations of critical thinkers and problem solvers, granting the firm more than six decades of near unparalleled success.

The A3 process is a way to look with "new eyes" at a specific problem identified by direct observation or experience. It offers a structure that begins by always defining the issue through the eyes of the customer. In *A3 Problem Solving for Healthcare* Cindy Jimmerson explains an essential tool borrowed from the Toyota Production System, which is an extension of work identified with the well-known Value Stream Map. She offers an easy-to-learn problem-solving method that can be used in every aspect of healthcare to identify, understand, and improve processes that don't support workers in doing their good work. An effective problem-solving process is a critical part of implementing efficient business practices and a problem-solving culture is a fundamental component of empowering employees to support business improvements. Both of these components, taken together, can help any organization make continuous improvements on the long journey to creating a more productive and profitable business.

While Lean practices have been successfully implemented into the process industry with excellent results for over 20 years (including the author's own award winning example at Exxon Chemical), that industry has
