This book presents in a concise and accessible way why the EU institutional system exists in its present form, how the EU fits into the world as a system of governance, and who is involved in EU policy processes. It outlines the historical context which has shaped the EU system, gives a summary of the system's basic principles and structures, and describes its actors, procedures and instruments. The main theme is to show that EU decision-making is not just a matter of action at some higher and separate level, of [them and us], but rather that it involves different forms of cooperation between European, national and regional authorities, as well as interaction between public and private actors. Numerous short case studies illustrate how people's day-to-day activities are affected by EU decisions, and how individuals' concerns are represented in the decision-making process. The book provides insights and examples which will be very helpful for all students of European integration. It will also be a valuable resource for European citizens wishing to understand the basic realities and rationales, as well as some of the dilemmas, behind EU policy-making.

The E.U. has an increasingly significant role in the everyday life of Europe's citizens. What are these policies about? Who is shaping them? What do they mean for the future? These are the questions that this book answers. The authors argue that some policies are implemented more vigorously than others. The policies that are driven by capital and that aim to create a competitive economy have been prioritized. By contrast, other policies do not form a key part of the E.U. agenda and are effectively ignored. Setting the E.U. in a proper economic and theoretical context, the authors provide a chapter-by-chapter analysis of each of the E.U.'s major policy areas. Arguing that traditional accounts of E.U. integration are inadequate, the authors develop an innovative new perspective. Written with clarity and precision, this book is ideal for students and anyone looking for an incisive critique of the role of corporate capital in the development of E.U. policy.

This book offers a good study of the development of telecommunications policy by the EU. . . Great value to those interested in understanding both European telecommunications policy and more generally in how policy-making operates in the EU. Mark Thatcher, West European Politics . . . the book provides an interesting perspective on the evolution of nature of telecommunications policy-making within the EU. As a consequence, the book should be of interest to telecommunications and politics/government researchers alike, Jason Whalley, Communications Booknotes Quarterly This well-written book deals with the emergence and shaping of telecommunications policy in Europe, with a particular focus on the time period of 1987 1998. . . This book fills an important gap reviewing the initial formative years of European telecommunications policy development and liberalization in detail. The book captures the complicated and interdependent policy formation process in Europe in a credible and thoughtful way, without falling into the trap of admiring critical personalities and key actors. . . The author has written an important and useful book, which invites the research community to further explore the evolution of European telecommunications policy. Erik Bohlin, Communications & Strategies Examining the emergence of a European Union telecommunications policy, Joseph Goodman explains how and why the policy developed as it did and why certain reforms in the sector were easier to achieve than others. He provides a history of the key actors in the policy-making process from the first attempts by the national postal, telegraph, and telecommunication administrations to coordinate their telecommunications policies in the 1950s, to the implementation of a comprehensive EU telecommunications regulatory structure in 1998 and the development of a new regulatory structure in 2003. The analytical framework employed by the author draws upon new institutionalism and actor-based approaches, providing an opportunity to evaluate the utility of a synthetic approach for examining and explaining EU policy-making. The focus of his analysis is on the European Commission s two-pronged strategy of liberalisation and harmonisation, which began in the late 1980s and culminated in an important milestone on January 1st 1998, when the EU Member States fully opened their telecommunications markets to competition. He concludes that a synthetic approach, which enables the researcher to apply a number of approaches to multiple settings and various levels of analysis, is useful even necessary in understanding and explaining the many dimensions of EU policy-making. This authoritative study will be of interest to all those in the telecommunications industry including attorneys, consultants, and lobbyists who would like to know how the EU s policy developed. It will appeal, more generally, to political scientists and scholars of European history and politics.

Based on an analytical evaluation of both the weaknesses and strengths of the Italian political system, Italy in the European Union is the first book to offer a detailed and comprehensive description of Italy's contribution to European Union policy-making. The contributors to this volume systematically explore the role played by Italian institutional and noninstitutional actors in several decision-making processes. They show how Italian institutional actors define and promote national policy preferences that are compatible with those of the other European member states. However, the book functions on two levels: it is both a nuanced picture of Italy's role in the EU and a study of the EU as it has been transformed by subsequent waves of enlargement. In a compound polity of twenty-seven member states the formation of stable hegemonic coalitions is implausible-the concept of national interest, which still informs much of the literature on the EU, is logically and empirically unusable in many EU policy realms. Combining empirical investigation and theoretical analysis, this book is indispensable for scholars, students, and practitioners who study or observe Italian politics. It is also necessary for those who want to understand the transformation of European politics and the European Union's increasing development as a compound polity. Contributions by: Marco Brunazzo, Maurizio Carbone, Sabrina Cavatorto, Vincent Della Sala, Alessia Donà, Sergio Fabbrini, Paolo Foradori, Giorgio Giraudi, Renata Lizzi, Simona Piattoni, Paolo Rosa, Stefano Sacchi, Alberta M. Sbragia, Daniela Sicurelli, and Luca Verzichelli

As two of the longest serving prime ministers in Europe, Tony Blair and Bertie Ahern were in power during one of the most tumultuous periods of European integration. This book offers a unique and fascinating insight into how they responded to the demands and opportunities of European Union membership at the national level. Drawing on extensive interviews with key figures, it explores how the two leaders sought to radically reshape the EU policy making process in the UK and Ireland in order to further their strategic policy agendas. It therefore asks three key questions. How did the national EU policy process change between 1997 and 2007? To what extent did the UK and Irish policy processes converge or diverge? Did the reforms enhance the projection of national policy? These important empirical and comparative questions are related to broader theoretical and conceptual debates concerning Europeanisation. By employing highly innovative conceptual and analytical frameworks, the book considers what these reforms tell us about the nature of the [EU effect] in different member states. Do governments simply adjust to EU-level pressures for change or try to adapt strategically in order to maximise their influence? Are the changes attributable to political agency or do they derive from longer-term structural developments in Brussels? These timely questions should be of great interest to both students and academics of European, British and Irish politics, policy practitioners within government, as well as anyone concerned with understanding the politics and policies that defined these two influential prime ministers.

Policies in the EU are largely made by national civil servants who prepare and implement decisions in Brussels as well as at home. Despite their important role, these national civil servants form a relatively hidden world that has received little attention from both the media and academics. This volume considers a wide variety of sources and research methods to answer such questions as: how many civil servants are actually involved in EU-related activities? What do these civil servants do when they engage with the EU? And how do they negotiate their dual roles? The New Eurocrats offers unique and invaluable insight into these civil servants and their working practicesand uncovers some secrets in the world of EU governance along the way.
