No other accounting text takes you further or gives you more. With CENTURY 21 ACCOUNTING MULTICOLUMN JOURNAL 9E, 2012 UPDATE, you place the advantage of more than 100 years of accounting success into your students' hands with the latest from this authoritative leader in accounting education. Each advantage you find in CENTURY 21 ACCOUNTING MULTICOLUMN JOURNAL reflects guidance from a Teacher Review Board of more than 60 experienced educators just like you and input from a first-of-its-kind Student Advisory Board. This edition's fresh, clean presentation addresses your contemporary classroom needs as effectively today as this best-selling text did more than a century ago when it redefined the accounting course. CENTURY 21 ACCOUNTING MULTICOLUMN JOURNAL starts with the five-column multicolumn journal before moving into special journals in Part Two. This is the only text to offer you a choice in accounting presentation. The ninth edition's new student-driven design integrates commercial technology such as Microsoft Excel, Peachtree(R), and QuickBooks(R) into the end of every chapter and offers the market's first online working papers. A unique focus on financial literacy and emphasis on character, as well as companies selected by students, prepare your class for accounting challenges. Financial Literacy for the 21st Century, new to the 2012 Update, guides students in the exploration of financial topics through engaging activities that provide opportunities for students to apply valued skills such as problem solving, critical thinking, and technology use as defined by the Partnership for 21st Century Skills. Acquisition of the knowledge and skills taught in this feature will prepare students to compete in a workplace that demands creativity and innovation. Trust the book's unwavering accuracy to ensure a complete text, a comprehensive package, and technology solutions with the advantage to move your course and your students ahead in today's times. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

No other accounting text takes you further or gives you more. With CENTURY 21 ACCOUNTING GENERAL JOURNAL 9E, 2012 UPDATE, you place the advantage of more than 100 years of accounting success into your students' hands with the latest from this authoritative leader in accounting education. Each advantage you find in CENTURY 21 ACCOUNTING GENERAL JOURNAL reflects guidance from a Teacher Review Board of more than 60 experienced educators just like you and input from a first-of-its-kind Student Advisory Board. This edition's fresh, clean presentation addresses your contemporary classroom needs as effectively today as this best-selling text did more than a century ago when it redefined the accounting course. CENTURY 21 ACCOUNTING GENERAL JOURNAL starts with the two-column general journal and then introduces students to special journals in Part Two. This is the only program that offers you a choice in accounting presentation. The ninth edition's new student-driven design integrates commercial technology such as Microsoft Excel, Peachtree(R), and QuickBooks(R) into the end of every chapter and offers the market's first online working papers. A unique focus on financial literacy and emphasis on character, as well as companies selected by students, prepare your class for accounting challenges. You bring treasures and specialty items from far-reaching lands to modern home d cor while practicing accounting applications in this dynamic merchandising business organized as a corporation. You complete the simulation after Chapter 16. Completion time is 10-17 hours.

Network Simulation Experiments Manual, Third Edition, is a practical tool containing detailed, simulation-based experiments to help students and professionals learn about key concepts in computer networking. It allows the networking professional to visualize how computer networks work with the aid of a software tool called OPNET to simulate network function. OPNET provides a virtual environment for modeling, analyzing, and predicting the performance of IT infrastructures, including applications, servers, and networking technologies. It can be downloaded free of charge and is easy to install. The book's simulation approach provides a virtual environment for a wide range of desirable features, such as modeling a network based on specified criteria and analyzing its performance under different scenarios. The experiments include the basics of using OPNET IT Guru Academic Edition; operation of the Ethernet network; partitioning of a physical network into separate logical networks using virtual local area networks (VLANs); and the basics of network design. Also covered are congestion control algorithms implemented by the Transmission Control Protocol (TCP); the effects of various queuing disciplines on packet delivery and delay for different services; and the role of firewalls and virtual private networks (VPNs) in providing security to shared public networks. Each experiment in this updated edition is accompanied by review questions, a lab report, and exercises. Networking designers and professionals as well as graduate students will find this manual extremely helpful. Updated and expanded by an instructor who has used OPNET simulation tools in his classroom for numerous demonstrations and real-world scenarios. Software download based on an award-winning product made by OPNET Technologies, Inc., whose software is used by thousands of commercial and government organizations worldwide, and by over 500 universities. Useful experimentation for professionals in the workplace who are interested in learning and demonstrating the capability of evaluating different commercial networking products, i.e., Cisco routers. Covers the core networking topologies and includes assignments on Switched LANs, Network Design, CSMA, RIP, TCP, Queuing Disciplines, Web Caching, etc.

Since process models are nowadays ubiquitous in many applications, the challenges and alternatives related to their development, validation, and efficient use have become more apparent. In addition, the massive amounts of both offline and online data available today open the door for new applications and solutions. However, transforming data into useful models and information in the context of the process industry or of bio-systems requires specific approaches and considerations such as new modelling methodologies incorporating the complex, stochastic, hybrid and distributed nature of many processes in particular. The same can be said about the tools and software

environments used to describe, code, and solve such models for their further exploitation. Going well beyond mere simulation tools, these advanced tools offer a software suite built around the models, facilitating tasks such as experiment design, parameter estimation, model initialization, validation, analysis, size reduction, discretization, optimization, distributed computation, co-simulation, etc. This Special Issue collects novel developments in these topics in order to address the challenges brought by the use of models in their different facets, and to reflect state of the art developments in methods, tools and industrial applications.
