Urban Sketching Architettura E Paesaggi Urbani

Urban areas have been caught up in a turbulent process of transformation over the past 50 years and changes have been rapid, with issues such as mobility, nature, water management, energy use and public space featuring prominently...x000D\_ In each Olympic year since 1988, the Faculty of Architecture at Delft University of Technology has held an international conference focusing on the connection between research and design, exploring the field of tension between science, technology and art...x000D\_ This book presents the proceedings of the latest in this series of conferences: New Urban Configurations, held in Delft, the Netherlands, in October 2012 in collaboration with the European Association for Architectural Education (EAAE) and the International Seminar on Urban Form (ISUF). This edition of the conference discussed the role and critical potential of the architectural project in the transformation process of cities and territories that leads to new urban configurations...x000D\_ The publication contains all 140 accepted papers and a selection of the keynote lectures presented at the conference. The papers have been grouped into five main themes: innovation in building typology; infrastructure and the city; complex urban projects; green spaces, and delta urbanism. Four of these major topics are further divided into several subtopics...x000D\_ This book will be of interest to everyone involved in designing, building, thinking about as well as managing the urban landscape and territory.

Tunnels and Underground Cities: Engineering and Innovation meet Archaeology, Architecture and Art. Volume 2: Environment sustainability in underground construction contains the contributions presented in the eponymous Technical Session during the World Tunnel Congress 2019 (Naples, Italy, 3-9 May 2019). The use of underground space is continuing to grow, due to global urbanization, public demand for efficient transportation, and energy saving, production and distribution. The growing need for space at ground level, along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives, demand greater and better use of the underground space to ensure that it supports sustainable, resilient and more liveable cities. The contributions cover a wide range of topics, from online identification of excavation materials, management and use of materials, the integration of tunnel entrances in landscapes, to site-specific protocols for evaluating environmental compatibility of spoil materials, and the reduction of adverse effects of blasting methods on the living environment. The book is a valuable reference text for tunnelling specialists, owners, engineers, archaeologists, architects, artists and others involved in underground planning, design and building around the world, and for academics who are interested in underground constructions and geotechnics.

Design-Driven Research encompasses many different forms of research in which architectural, design, and artistic practices and the results thereof, are implemented as a means to generate and disseminate new knowledge. This includes contemporary alternative formulations of the field, like Artistic Research, Research by Design, Practice-Based/Led Research, Creative Practice Research. CA2RE+ is a joint Erasmus+ strategic partnership of nine European universities in association with EAAE, ELIA and ARENA, and it supports early-career researchers and Ph.D. students to improve the quality of their research. CA'RE+ explicates the transformative and innovative power of highly individual strategies in artistic research, the diversity of research traditions, and the integrative nature of architectural design research, able to face the contemporary knowledge fragmentation from humanities, social sciences, and technology. Along with the CA2RE+ timeline project, the focus of Milano conference narrows by comparing design strategies and tactics applied to highlight common approaches and methodological specificities within the consortium and the broader community involved.

This book explores the role of technology in ecological urban design and regeneration. Part I provides theoretical and methodological insights into technological approaches that offer optimum respect to existing cultural and natural environments, while offering minimum impact and carbon footprint. Parts II and III provide contextualised examples that demonstrate the use, or proposal of, sustainable technologies and solutions for regenerating parts of the urban and peri-urban. The case studies offer insights from the Mediterranean and the Middle East in a diverse range of spaces, from central urban squares, oblique cities, urban waterfronts, decaying suburbs, to peri-urban areas such as touristic waterfronts, former industrial areas, hyper-commercial areas, humid zones and parks.

In questo lavoro " Progettare Paesaggio, Landscape as Infrastructure " si confrontano: da un lato le stimolanti proposte progettuali redatte dal gruppo di studenti della Harvard Graduate School of Design guidati dalla docente Paola Cannavò; dall ' altro l ' analisi del territorio portuense ed ostiense e delle possibili future trasformazioni del contesto paesaggistico determinate dai progetti infrastrutturali, in fase di realizzazione o di valutazione, con ipotesi di linee guida per la riqualificazione e la valorizzazione di questa area, intesa come complesso palinsesto storico e paesaggistico, al fine di rendere evidenti le modalità procedurali di quella reale tutela attiva e dinamica del paesaggio affidata al Ministero per i beni e le attività culturali e da sempre svolta. [ANTONIA P. RECCHIA – Direttore Generale, Direzione Generale per il paesaggio, le belle arti, l ' architettura e l ' arte contemporanea, MiBAC]
The project " Progettare Paesaggio, Landscape as Architecture " combines the inspiring design proposals drafted by a group of students of the Harvard Graduate School of Design headed by the teacher Paola Cannavò with a study of the portuense and ostiense areas and how the landscape might change due to the construction of new infrastructure, either being completed or in the design stage. The study includes guidelines for the requalification and enhancement of the area considered as a complex historical landscape; it also highlights the past and present active and dynamic protection measures and procedures adopted by the Italian Ministry of Cultural Heritage and Activities. [ANTONIA P. RECCHIA – Director General, Directorate General for the landscape, fine arts, architecture and contemporary art, MiBAC]
" Questa pubblicazione e la ricerca progettuale qui documentata, propongono una opportuna testimonianza delle sfide contemporanee della forma urbana, del processo ecologico e dello sviluppo economico affrontato dalla capitale italiana. "
" Evidenziando gli impulsi complessi e contraddittori di tipo ecologico ed economico di un paesaggio portuale attivo, Cannavò propone un nuovo ruolo chiave per l ' architettura del paesaggio come strumento urbanistico. Così facendo promuove una posizione italiana all ' interno del dibattito contemporaneo sul Landscape Urbanism e l ' Ecological Urbanism fornendo al contempo una prospettiva futura per l ' urbanistica, anche nell ' area di Fiumicino. "
[CHARLES WALDHEIM – Direttore, Dipartimento di Architettura del Paesaggio, Harvard Graduate School of Design]
" This publication, and the design research that it documents, offers timely evidence of the contemporary challenges of urban form, ecological process, and economic development faced by the Italian capital. "
" Highlighting the complex and contradictory ecological and economic impulses of a working port landscape, Cannavò proposes a renewed relevance for landscape architecture as a medium of urbanism. In so doing, she stakes an Italian position in the contemporary discourses of landscape urbanism and ecological urbanism, while pointing to a way forward for urbanism, even in the fields of Fuimicino. "
[CHARLES WALDHEIM – Chair, Department of Landscape Architecture, Harvard Graduate School of Design]

For more information including the introduction, a full list of entries and contributors, a generous selection of sample pages and more, visit the Encyclopedic dia of 20th Century Architecture website. Focusing on architecture from all regions of the world, this three-volume set profiles the twentieth century's vast chronicle of architectural achievements, both within and well beyond the theoretical confines of modernism.

Unlike existing works, this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types, movements, styles, and building practices across traditional geographic and cultural boundaries.

This book combines urban planning and architectural tools in an attempt to overcome the limitations of sectoral measures. In this perspective, it offers a forum for the debate of different approaches used by schools of planning and architecture. It explores strategies by drawing from the potential contributions of cognitive models for decisions, the role of utopian thinking and retrofitting actions and their interconnectedness, the role of cultural legacy for urban and landscape design, the design perspectives about public spaces, and the role of architecture design and urban and regional planning for landscape quality. The book also discusses on design as a process of decision-making that operates as an act of empathy that aligns with human and ecological values- emotional, physical and socio-cultural. Each planning and design act has different possible effects able to help making clear strategic and local actions, contributing to community empowerment and to landscape and local governance. Design activity along the river and multiple experiences (design processes, urban fringe design, agri-urban models, river parks, UNESCO sites, River Contracts, greenbelts and ecological networks), through reflection on design roles, helping to understand the design process and its results at different scales. Roberta Ingaramo, architect, PhD, is Assistant Professor in Architectural and Urban Design, Department of Architecture and Design (DAD), Polytechnic University of Turin (Italy). Master in Conservation of Historic Towns and Buildings, Katholieke Universiteit (Belgium). roberta.ingaramo@polito.it
Angioletta Voghera, architect, PHD, is Associate Professor of Urban and Regional Planning, Inter-university Department of Urban and Regional Studies and Planning (DIST), Polytechnic University of Turin (Italy). angioletta.voghera@polito.it

In The Art of the City Raffaele Milani reflects on the ways in which inhabitants of the cityscape have interacted on a spiritual, psychological, and philosophical level with the architecture that surrounds them. Working with the premise that the city has a " soul, " which is externalized in the physical structures of its urban space, Milani expresses alarm in the face of sprawling megacities that typify the postmodern age and endanger the survival of cities ' distinctiveness. While he laments that the nature surrounding cities is disappearing under concrete, his concern is counterbalanced by the realization that there are ongoing projects of urban reclamation, renewal, and reutilization aimed at preserving an ancient, almost mystical rapport between the citizen and the lived space. Milani illustrates his argument by citing the works of modern architects including Emilio Ambasz, Massimiliano Fuksas, Frank Gehry, Rem Koolhaas, Kisho Kurokawa, Daniel Libeskind, and Renzo Piano. Rather than a history of architecture, The Art of the City is a compelling and timely reflection on the important challenge of insuring the continued liveability and aesthetic valorization of public spaces.
