Generate reports with style! The SAS Programmer's PROC REPORT Handbook: ODS Companion explains how to use style elements within a style template to customize reports generated by PROC REPORT, leading to more appealing and effective business reports. Many programmers are faced with generating reports that are easy to read and comprehend for a wide variety of audiences, which is where the ODS destinations and style changes come into play. This book teaches you how to use style elements in PROC REPORT, a versatile reporting procedure, to customize your output. Mastering style elements allows you to change visual aspects of reports, such as borders, column widths, fonts, backgrounds, and more. This companion to The SAS Programmer's PROC REPORT Handbook: Basic to Advanced Reporting Techniques explores how the style elements within a style template affect the output generated by PROC REPORT. It provides examples of altering the style elements and the effect on the main ODS destinations, while also discussing common pitfalls that programmers can avoid while working with tables, Microsoft Excel, Microsoft Power Point, and PDF output.

Together, InfoPath 2010 and Microsoft SharePoint Designer 2010 make it possible to create end-to-end solutions that combine powerful forms, enterprise-scale workflow, and access to key business data. Now, building on the valuable content from their previous InfoPath book, three Microsoft experts offer a complete introduction to building the forms that drive these solutions. Designing Forms for SharePoint and InfoPath combines deep knowledge of InfoPath, new insights into SharePoint development, and an insider's view of new InfoPath features for building more powerful SharePoint applications. Ideal for information workers, power users, and experienced form designers and developers, this book teaches new techniques through downloadable examples, including form templates, code, and XML. You'll start with a complete hands-on primer for designing rich forms with InfoPath Designer, covering Forms Services, data retrieval and submission, controls, customization, saving, publishing, and workflow. Next, you'll turn to advanced form design, including coding, the InfoPath object model, and InfoPath hosting options. Coverage includes Mastering best practices for designing forms and working with data Creating and editing SharePoint list forms in InfoPath 2010 Setting up Forms Services in SharePoint 2010 Using new InfoPath controls and customization techniques Adding logic without code via Quick Rules and the
